

THE STATE OF NEVADA

PERMIT TO APPROPRIATE WATER

Name of Permittee: DANIEL S. VENTURACCI
Source: UNDERGROUND
Basin: DIAMOND VALLEY
Manner of Use: IRRIGATION AND DOMESTIC
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST
Priority Date: 04/26/2012

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to State Engineer Ruling No. 6290, dated August 15, 2014. The quantification of this mitigation right is not an adjudication of Proof of Appropriation No. V01115. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. It is understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the proof of completion of work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The permittee shall keep monthly records of the amount of water pumped from this well and the records must be submitted to the State Engineer on an annual basis within 30 days after the end of each calendar year.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 81825 and 82572 shall not exceed 612.9 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This right is issued to mitigate Proof of Appropriation V01115 which has a claimed priority date of 1880 or earlier. Additionally, this permit cannot be severed from Proof of Appropriation V01115.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 1.54 cubic feet per second or 612.9 acre-feet annually, but not to exceed 4.0 acre-feet per acre from all sources.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

September 15 2015

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

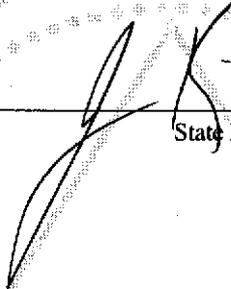

September 15 2017

Map in support of proof of beneficial use shall be filed on or before:

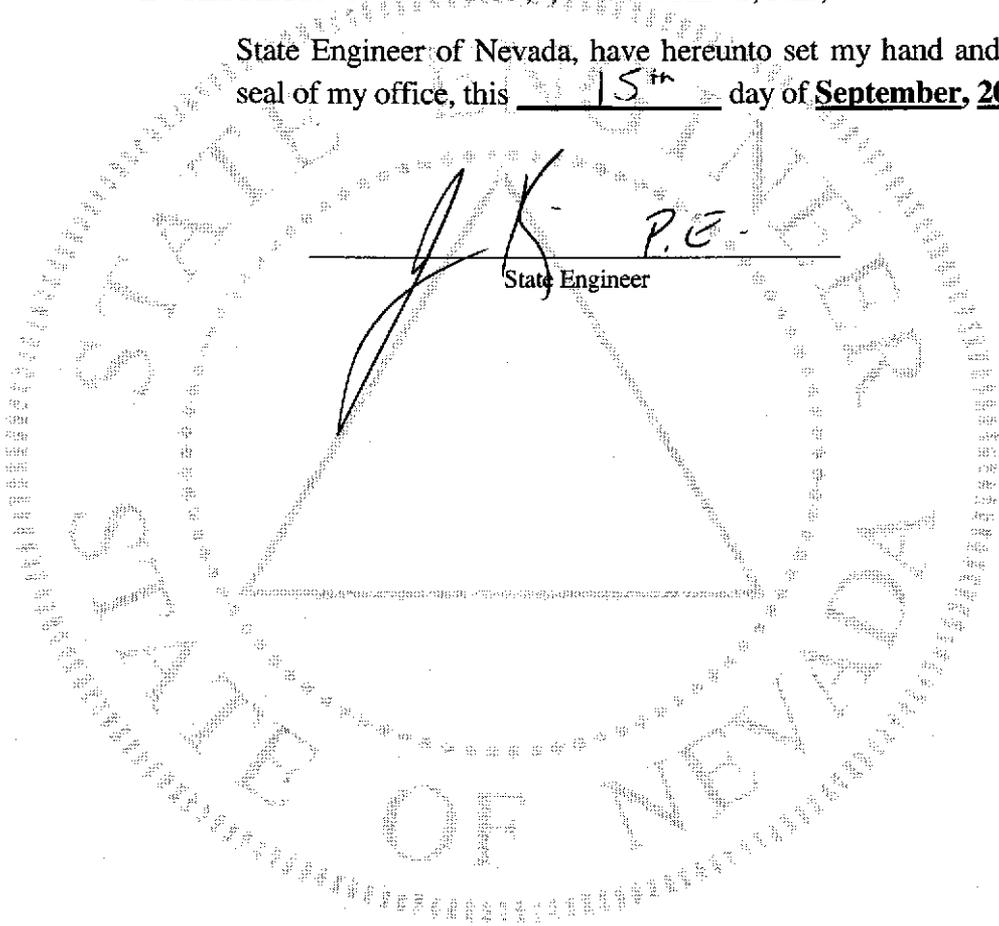

September 15 2017

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 15th day of **September, 2014**

P.E.
State Engineer

Application No. 81825

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY	
Date of Filing in State Engineer's Office	<u>APR 26 2012</u>
Returned to applicant for correction	_____
Corrected Application filed	_____ Map filed <u>APR 26 2012</u>

The applicant Daniel S. Venturacci
8500 Schurz Highway of Fallon
Street Address or P.O. Box City or Town
Nevada 89406 hereby make(s) application for permission to appropriate the
State and ZIP Code

public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

- The source of water is underground
Name of the stream, lake, underground, spring or other sources.
- The amount of water applied for is 8.0 cfs
One second foot equals 448.83 gallons per minute.
 - If stored in a reservoir give the number of acre-feet _____
- The water is to be used for irrigation, stock watering and domestic
Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
- If use is for:
 - Irrigation, state number of acres to be irrigated 607.93 acres
 - Stockwater, state number and kind of animals 100 horses, 500 cows
 - Other use (describe fully in No. 12) _____
 - Power:
 - Horsepower developed _____
 - Point of return of water to stream _____

REL per e-mail

153-EU

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 3, T.23N., R.54E., M.D.M. from which the E $\frac{1}{4}$ -corner of said Sec. 3 bears N.43°47'E., 1,125 feet distant.

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

607.93 acres. See attached table, taken from amended claim #01115

7. Use will begin about January 1 and end about December 31 of each year.
Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

drilled and cased well, direct discharge into existing spring pond and natural channels, utilizing existing distribution methods as depicted on map of amended claim #01115.

9. Estimated cost of works: \$60,000.00

10. Estimated time required to construct works: three years

(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: five years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Lands described to be irrigated under this application are identical to those described and mapped under amended claim #01115. It is presumed that depletion of spring water subject of that claim has occurred by reason of excessive pumping of underground water nearby. This application seeks to restore irrigation by diverting from underground that water which formerly discharged at the surface as Taft Spring, and applied to said land in a supplemental manner.

13. Miscellaneous remarks:

Amended claim #01115 and map are to be made a part of this application, by reference. Please send copies of notices and correspondence to undersigned agent.
