

THE STATE OF NEVADA

PERMIT TO CHANGE THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Name of Permittee: WASHOE COUNTY
Source: BROWNS CREEK, SOUTH BRANCH OF WHITES CREEK
Basin: TRUCKEE CANYON SEGMENT
Manner of Use: MUNICIPAL
Period of Use: AS DECREED
Priority Date: AS DECREED

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, place of use and manner of use of a portion of the waters of Brown's Creek as heretofore granted under Permit 75130, which changed the point of diversion, place of use and manner of use of a portion of Claim 715/715A, Truckee River Decree, is issued subject to the terms and conditions imposed in said decree and with the understanding that no other rights on the source will be affected by the change proposed herein. A suitable measuring device must be installed and accurate measurements of water placed to beneficial use must be kept.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

A monitoring and operating plan must be submitted and approved by this office prior to any diversion of water under this permit. This plan must include monthly reporting to the State Engineer and the Federal Water Master of all measurements necessary to determine the availability of Brown's Creek, being the south branch of White's Creek, make-up water and the diversion from the Truckee River based upon those measurements.

Truckee River water diverted under this permit must not exceed the measured flow in Brown's Creek, being the south branch of White's Creek that is demonstrated to pass through Steamboat Creek to the Truckee River. This amount of water must be diverted for municipal use within 30 days of this recorded flow.

The North Truckee Ditch point of diversion may only be utilized under this permit when it will not impact those rights between this point of diversion and the confluence of the Truckee River with Steamboat Creek, more specifically those water rights from the Pioneer Ditch.

The Chalk Bluff Treatment Plant points of diversion may only be utilized under this permit during the non-irrigation season as determined by the Federal Water Master and when the Floriston Rate is being met.

(Continued on Page 2)

This permit is issued subject to continuing jurisdiction and regulation by the Federal Water Master and the State Engineer.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.811 cubic feet per second or 105.59 acre-feet as-decreed.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

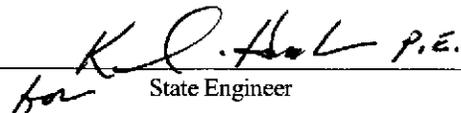

October 25 2022
