APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 50722 is issued subject to the terms and conditions imposed in said Permit 50722 and with the understanding that no other rights on the source will be affected by the change proposed herein. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

Any well drilled under Permit 50722 shall be plugged in accordance with the Nevada Administrative Code, Chapter 534.420, "Regulations for Water Well and Related Drilling" within 60 days from the issuance of this permit.

If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

The base right for this permit was issued to UICN prior to the tiered dedication rate prescribed by the State Engineer by letter dated November 4, 2008; therefore any dedication of water from this permit for residential service shall remain at the 1.12 acre-feet per lot. The State Engineer may amend this dedicated allocation based on evidence and supporting data.

The point of diversion and place of use are as described on the submitted application to support this permit.
