

THE STATE OF NEVADA

PERMIT TO APPROPRIATE WATER

Name of Permittee: DELONG RANCHES, INC
Source: DREAM WELL
Basin: DESERT VALLEY
Manner of Use: STOCKWATERING
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST
Priority Date: 08/22/2012

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times but does not take responsibility for the use of the Federal range.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permit 44786, Certificate 11902; Permit 50059, Certificate 12676; Permit 57118, Certificate 14363; Permit 58060, Certificate 14597; Permit 58061, Certificate 14598; Permit 58062, Certificate 14599; Permit 58063, Certificate 14600; Permit 58064, Certificate 14601; Permit 58065, Certificate 14602; Permit 65683, Certificate 16201; Permit 65685, Certificate 16202; Permits 80345, 80826, 82079, and 82080 shall not exceed 44.81 acre-feet to water 2,000 head of cattle, annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.0124 cubic feet per second sufficient to water 400 head of cattle, but not to exceed 8.96 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

December 26 2013

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

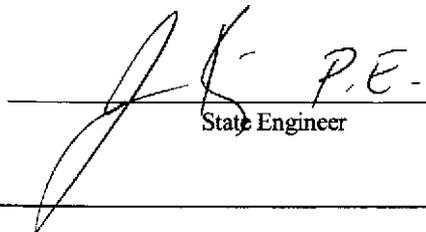

December 26 2015

Map in support of proof of beneficial use shall be filed on or before:

N/A

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY	
Date of Filing in State Engineer's Office	<u>AUG 22 2012</u>
Returned to applicant for correction	_____
Corrected Application filed	_____
Map filed	<u>AUG 22 2012</u>

The applicant DeLong Ranches, Inc.
335 Bottle Creek Road of Winnemucca,
Street Address or P.O. Box City or Town
Nevada 89445 hereby make(s) application for permission to appropriate the
State and ZIP Code

public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

DeLong Ranches, Inc. was incorporated May 6, 1969, in Nevada.

1. The source of water is underground well (Dream Well)
Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.0124 cfs
One second foot equals 448.83 gallons per minute.
 - (a) If stored in a reservoir give the number of acre-feet _____
3. The water is to be used for Stockwater
Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
 - (a) Irrigation, state number of acres to be irrigated _____
 - (b) Stockwater, state number and kind of animals Stockwater, 400 head of cattle
 - (c) Other use (describe fully in No. 12) _____
 - (d) Power:
 - (1) Horsepower developed _____
 - (2) Point of return of water to stream _____

 STATE ENGINEERS OFFICE

31-44

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within the SE1/4 of the SW 1/4 of Section 4, T36N, R33E, M.D.M., or at a point from which the northeast corner of said Section 4 bears North 32°54'31" East a distance of 5354.62 feet.

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

SE1/4 of the SW 1/4 of Section 4, T36N, R33E, M.D.M.

7. Use will begin about January 1 and end about December 31 of each year.

Month and Day

Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

The water will be diverted by an underground drilled well with a windmill tower pumped into a water trough with an overflow holding pond. A submersible pump will also be installed that can pump water from the well.

9. Estimated cost of works: \$10,000

10. Estimated time required to construct works: Completed.

(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 5 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

The project includes a 6-inch diameter metal casing underground well pumped from the ground by a windmill tower with a 10-foot diameter fan. A submersible pump is installed that can be used to pump the water from the well. The water is then to be diverted into a 15-foot diameter round galvanized steel trough with a cement bottom and finally into a 20-foot diameter x 3-foot deep overflow holding pond or reservoir. The water is used for livestock.
