This permit, to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 20369, Certificate 5932, is issued subject to the terms and conditions imposed in said Permit 20369, Certificate 5932 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 75048, 77719, 82083, 82084, 82085, and 82086 shall not exceed 505.148 acre-feet annually.

This permit for underground water is issued as a supplemental water supply to lands that have surface water rights from the Walker River as set forth in Claim Number 145 of the Walker River Decree C-125, or from storage water provided from the Walker River Irrigation District. The total diversion of water for irrigation from any and all sources shall not exceed the duty of water for this place of use as set forth in the Decree. Underground water shall not be pumped from the well described in this permit except to the extent necessary to make up that portion of the entitled duty from Decree and storage water in any given year.
