

THE STATE OF NEVADA

PERMIT TO APPROPRIATE WATER

Name of Permittee: HANK & MARIAN FILIPPINI FAMILY TRUST
DATED DECEMBER 22, 2003

Source: UNDERGROUND

Basin: LOWER REESE RIVER VALLEY

Manner of Use: STOCKWATERING

Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST

Priority Date: 09/10/2012

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times but does not take responsibility for the use of the Federal range.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 57701, 76503, Certificate 18462; Permit 76504, Certificate 18463; and Permit 82098 shall not exceed 6.72 acre-feet annually or sufficient to water 300 head of cattle.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

Month and Day Month and Day

8. Description of proposed works (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with pump and motor, etc.)

Drilled well, pipelines, and stock troughs.

9. Estimated cost of works: Well completed under Permit 35215, Certificate No. 11624.

10. Estimated time required to construct works: 3 years
If well completed, describe works.

11. Estimated time required to complete the application of water to beneficial use 5 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary):
(Failure to provide a detailed description may cause a delay in processing.)

The proposed point of diversion of this application is the same point of diversion as the well
under Permit 35215, Certificate 11624. This well will no longer produce sufficient amounts of
water to irrigate the certificated acreage allowed for under Permit 35215 and we are filing an
application to change the point of diversion of Permit 35215 to a different location. The existing
well will however produce adequate waters to be utilized for stockwatering purposes and this
application is being filed to take advantage of this well for this purpose.
