This plan must include monthly reporting to the State Engineer and the Federal Water Master of all measurements necessary to determine the availability of White's Creek make-up water and the diversion from the Truckee River based upon those measurements.

Truckee River water diverted under this permit must not exceed the measured flow in White's Creek that is demonstrated to pass through Steamboat Creek to the Truckee River. This amount of water must be diverted for municipal use within 30 days of this recorded flow.

The North Truckee Ditch point of diversion may only be utilized under this permit when it will not impact those rights between this point of diversion and the confluence of the Truckee River with Steamboat Creek, more specifically those water rights from the Pioneer Ditch.

The Chalk Bluff Treatment Plant points of diversion may only be utilized under this permit during the non-irrigation season as determined by the Federal Water Master.

This permit is issued subject to continuing jurisdiction and regulation by the Federal Water Master and the State Engineer.
