APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the proof of completion of work is filed. The State retains the right to regulate the use of the water granted herein at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permit 30059, Certificate 10111; Permit 30061, Certificate 10112; Permit 40201, Certificate 10123; Permit 40202, Certificate 10124; Permit 40203, Certificate 10125; Permit 77094, Permit 82482, and Permit 82483 shall not exceed 2,731 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The current land owner is reapplying for water to irrigate the same POU as Permit 57432 to make better use of his existing fields and pivot. This application is 1 of 2 being submitted and we are in full understanding that any waters allocated will be limited to 4 ac-ft/ac from all sources.
