#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the place of use of the waters of an underground source as heretofore granted under Permit 40153 is issued subject to the terms and conditions imposed in said Permit 40153 and with the understanding that no other rights on the source will be affected by the change proposed herein. This permit is further subject to revocation if and when water can be furnished by an entity such as a water district or a municipality engaged in furnishing water. This well shall be equipped with a two (2) inch opening for measuring depth to water and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permit 81522 and Revocable Permit 82517, having the same point of diversion and a commingled place of use, shall not exceed 3.29 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

This permit is issued for Industrial purposes within the described place of use, further identified by the Clark County Assessor as APN's 123-32-401-002, 123-32-301-013 and 123-32-301-014.

The issuance of Revocable Permit 82517 totally abrogates Revocable Permit 40153.

(Continued on Page 2)

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.002 cubic feet per second or 1.3 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

**N/A-Filed Under 81522 on February 08, 2012**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

November 4 **2016**

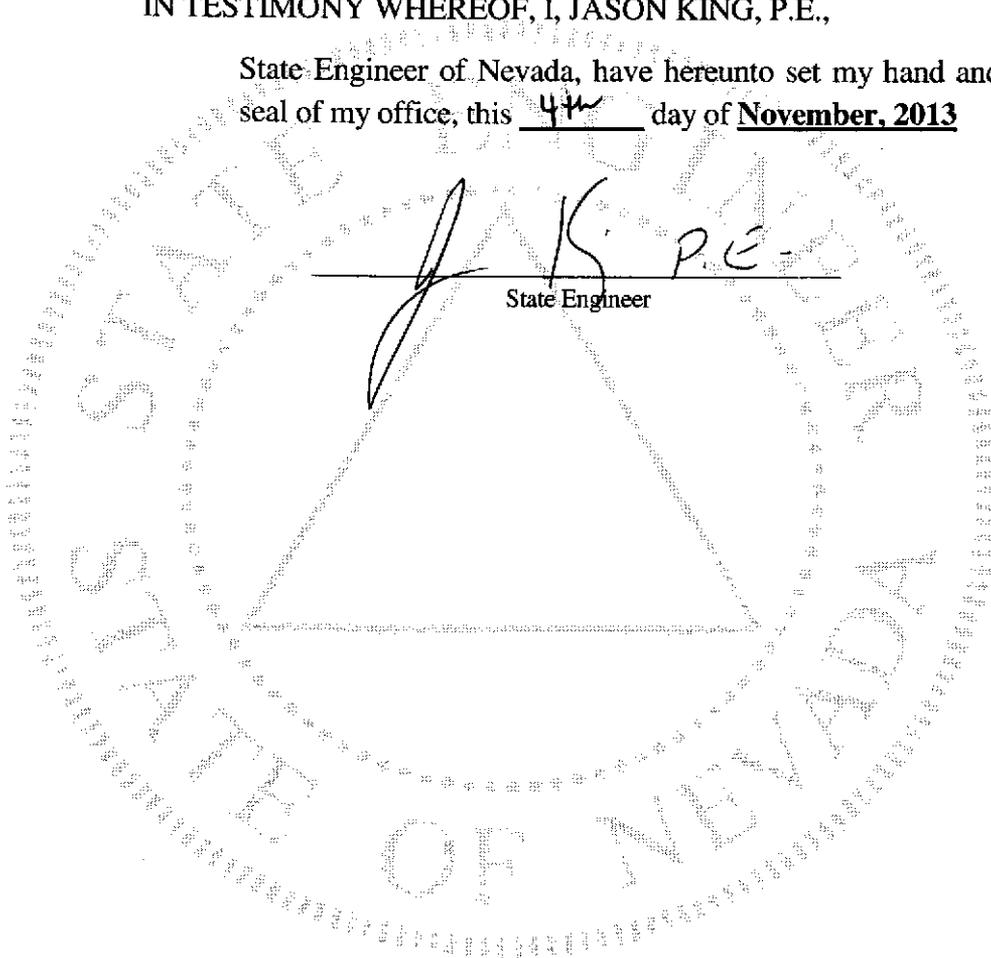

Map in support of proof of beneficial use shall be filed on or before:
