Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Drilled and cased well, pump, motor, totalizing meter and distribution lines/ditches

9. Estimated cost of works: \$60,000.00

10. Estimated time required to construct works: Three (3) years
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: Five (5) years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

This appropriation seeks to replace the vested water rights existing on the property from springs and seeps that were used historically as a ranch within the place of use. Wells will be drilled to convey the water within the place of use for crop production, primarily for the production of alfalfa and other hay crops. The appropriation is sought to replace the historical use that occurred on or before 1858

13. Miscellaneous remarks:

This application is being filed to mitigate impacts to existing vested rights on the Cox Ranch. This application seeks to supplement existing right for mitigation purposes only and is limited to the extent of historic senior water diversions associated with the Cox Ranch. The water is to be used in conjunction with a simultaneously filed application for Cox Well #2.
