#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 23429, Certificate 7939, is issued subject to the terms and conditions imposed in said Permit 23429, Certificate 7939 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 82763, 82764, 82765 and 82766 shall not exceed 437.42 acre-feet annually for the irrigation of 87.48 acres within the described place of use.

The total combined duty of water under Permits 82765 and 82766, having the same point of diversion, shall not exceed 183.71 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

This permit is issued for irrigation purposes within the described place of use, further identified as Nye County Assessor APN's 45-081-07, 45-081-16, 45-081-19, 45-081-21, 45-081-91, 45-081-92, 45-081-93 and 45-081-95.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.0385 cubic feet per second or 11.5 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

January 28 2015

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

January 28 2017

Map in support of proof of beneficial use shall be filed on or before:

January 28 2017

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 28<sup>th</sup> day of January, 2014
