

**THE STATE OF NEVADA****PERMIT TO CHANGE THE PUBLIC WATERS OF THE
STATE OF NEVADA HERETOFORE APPROPRIATED**

Name of Permittee: MADDI'S FRIESIAN RANCH, LLC
Source: UNDERGROUND
Basin: CARSON VALLEY
Manner of Use: IRRIGATION AND DOMESTIC
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST
Priority Date: 11/05/1964

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 70883, Certificate 18921, is issued subject to the terms and conditions imposed in said Permit 70883, Certificate 18921 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 56296, 80956, 80957, 83283 and 83284 shall not exceed 54.84 acre-feet annually. These permits are totally supplemental to lands having existing water rights under V05314 and V06315, Mott Creek Final Order of Determination. Water from these permits may only be applied to lands having surface water rights from Mott Creek.

The total combined duty of water under Permits 83283 and 83284 shall not exceed 24.84 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

(Continued on Page 2)

A total of 51.71 acre-feet annually is abrogated from the base right. However, this base right is supplemental to Claims on the West Fork of the Carson River (1864 priority), a more reliable source than Mott Creek. The priority of 1864 receives an average of 54% of full supply annually, requiring an average usage of only 46% of supplemental underground water rights. Therefore, only 23.8 acre-feet of this 51.71 acre feet may be diverted annually.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.071 cubic feet per second or 23.8 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

June 12 2015

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

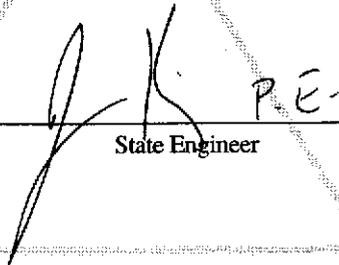

June 12 2017

Map in support of proof of beneficial use shall be filed on or before:

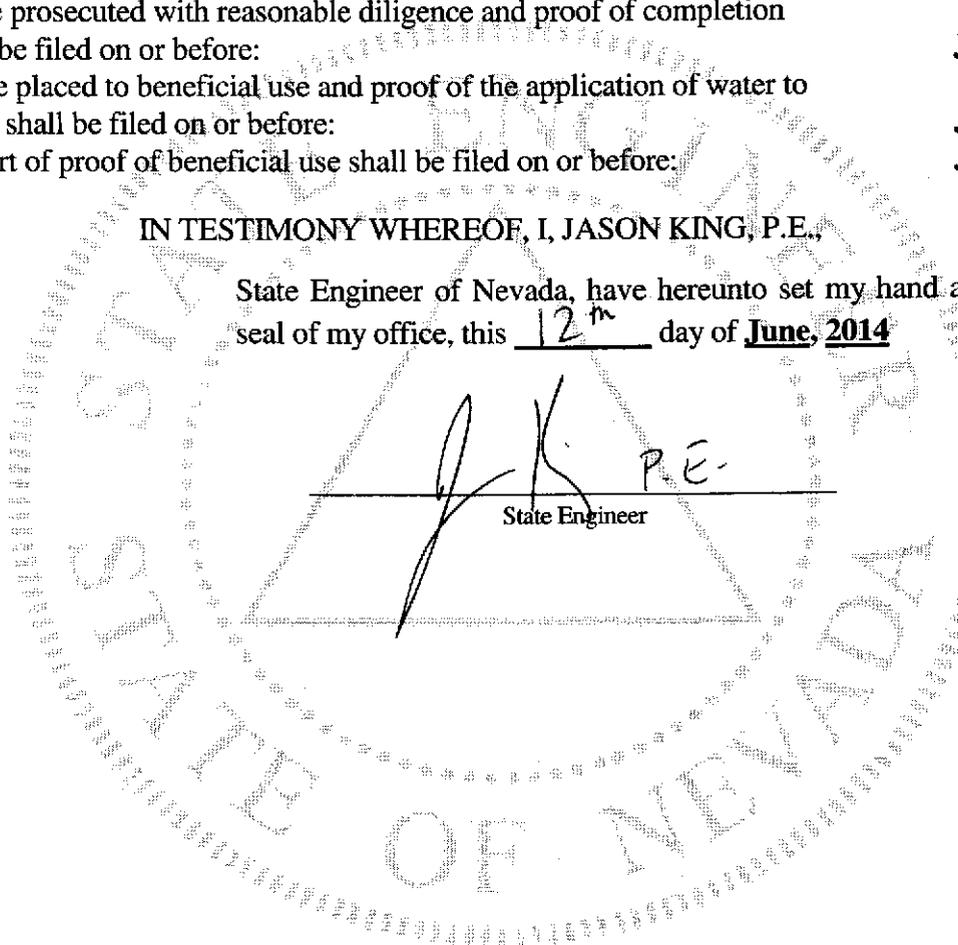

June 12 2017

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 12^m day of June, 2014
