APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permit 65815, Certificate 16307; Permit 81023, Certificate 19137; Permit 81024, Certificate 19138; Permit 81025, Certificate 19139; Permit 81026, Certificate 19140; Permit 81027, Certificate 19141; Permit 81028, Certificate 19142; Permits 82075 and 83313 shall not exceed 22.4 acre-feet annually or sufficient to water 1,000 head of cattle.
