This permit, to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 53200, is issued subject to the terms and conditions imposed in said Permit 53200 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed.
