#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 53198, is issued subject to the terms and conditions imposed in said Permit 53198 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Claim V01864 (Thousand Springs Creek Decree), surface water Permit 2552, Certificate 478 and surface water Permit 2964 and underground Permits 83461 through 83472 shall not exceed 13,024.8 acre-feet annually for the irrigation of 3,256.20 acres within the described place of use. A total of 1,132.91 acres of underground water rights is supplemental to surface water.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.94 cubic feet per second or 680.36 acre-feet annually, but not to exceed 4.0 acre-feet per acre from all sources.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

June 26 2015

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

June 26 2017

Map in support of proof of beneficial use shall be filed on or before:

June 26 2017

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 26<sup>th</sup> day of June, 2014
