APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the place of use of a portion of the waters of an underground source as heretofore granted under Permit 79977, is issued subject to the terms and conditions imposed in said Permit 79977 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 30 days after the end of each calendar quarter.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of surface water under Permits 83524, 83525, 83526, and 83527 shall not exceed 1,052.5 acre-feet as decreed.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Temporary Permit 83643T will expire upon approval of this permit.

(Continued on Page 2)

The proposed place of use of this permit has underlying surface water and is fully supplemental to waters of the Rebel Creek Decree, under Permits 83524, 83525, 83526 and 83527. All surface water rights must be fully utilized and the groundwater may be diverted only to the extent that surface water is not available.

The point of diversion and place of use are as described on the submitted application to support this permit.
