

THE STATE OF NEVADA

PERMIT TO APPROPRIATE WATER

Name of Permittee: SCEIRINE ENTERPRISES, LLC
Source: UNDERGROUND
Basin: MASON VALLEY
Manner of Use: STOCKWATERING
Period of Use: SEPTEMBER 15TH THROUGH JUNE 15TH
Priority Date: 02/28/2014

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times but does not take responsibility for the use of the Federal range.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

This permit is also issued subject to the provision that the place of use of the water herein granted is limited to and supplemental to lands having existing Walker River Decree water rights under Claim 118.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued under the provisions of NRS 534.120(2) as a preferred use.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.0030 cubic feet per second or 1.62 acre-feet seasonally.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

October 28 2015

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

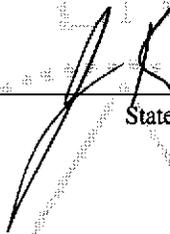

October 28 2017

Map in support of proof of beneficial use shall be filed on or before:

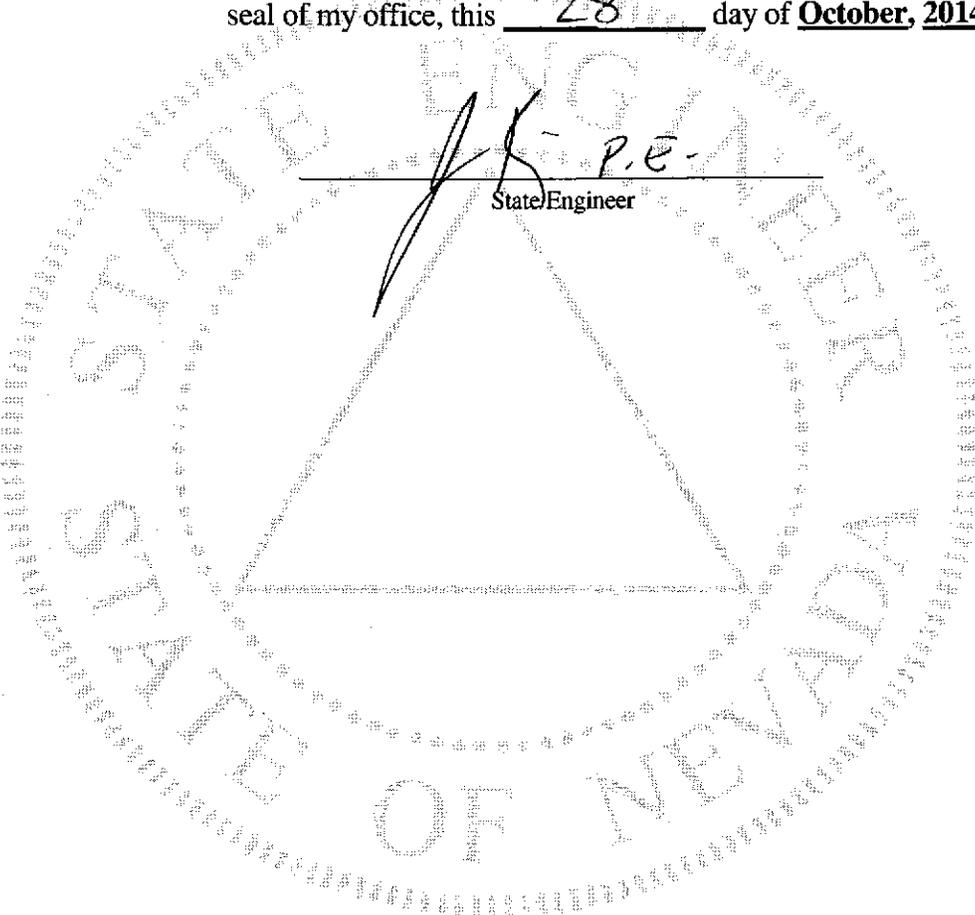

N/A

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 28th day of **October, 2014**

13,

-
1. The source of water is underground
Name of the stream, lake, underground, spring or other sources.
 2. The amount of water applied for is 0.003 cfs (1.25 gpm)
One second foot equals 448.83 gallons per minute.
 - (a) If stored in a reservoir give the number of acre-feet _____
 3. The water is to be used for Stockwater
Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
 4. If use is for:
 - (a) Irrigation, state number of acres to be irrigated _____
 - (b) Stockwater, state number and kind of animals 200 head of cattle
 - (c) Other use (describe fully in No. 12) _____
 - (d) Power:
 - (1) Horsepower developed _____
 - (2) Point of return of water to stream _____

9-108
24

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

SW 1/4 SE 1/4 of Section 28, T.14N., R.25E., MDB&M or at a point which the South 1/4 corner of Section 28, T.14N., R.25E., MDB&M bears S58° 23' 38"W a distance of 1,395.73'.

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

S 1/2 NW 1/4 of Section 28, SW 1/4 NE 1/4, NW 1/4 SE 1/4, NE 1/4 SE 1/4, SW 1/4 SE 1/4 of Section 28, Township 14 North, Range 25 East MDB&M.

7. Use will begin about September 15 and end about June 15 of each year.
Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Water will be diverted using a drilled well with solar run pump and motor.

9. Estimated cost of works: \$10,000.00

10. Estimated time required to construct works: 6 Months

(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 5 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Due to the drought conditions expected this year and future years additional stock water wells are needed to provide water to our cattle. This well will only be used when we do not have sufficient surface water. We understand that the amount of water is not sufficient for the total number of cattle we have, but we are limited by Order 1125.

13. Miscellaneous remarks:

Please see the attached letter from the Walker River Water Master regarding surface water availability to our ranch.

WALKER RIVER

In the District Court of the United States
In and For the District of Nevada
In Equity, Docket No. C-125
The United States of America, Plaintiff
vs.
Walker River Irrigation District, et al.

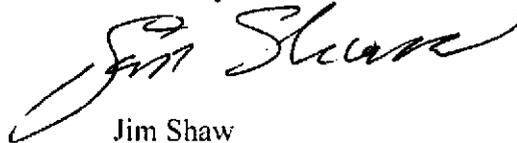

February 25, 2014

To Whom It May Concern:

Due to the anticipated shortage of snow pack and runoff (33% of average) there will not be any water available, on March 1, 2014, for the Campbell Ditch, either for irrigation or stock.

This is the third year of a worsening drought.

Sincerely,

Jim Shaw
Walker River Water Master
