APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit 75408, is issued subject to the terms and conditions imposed in said Permit 75408 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 75408 and 83679T shall not exceed 570.0 acre-feet annually for the irrigation of 190 acres within the described place of use.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire 1 year after the approval of the permit at which time all rights herein granted shall revert to the right being changed by this temporary permit.

The issuance of Temporary Permit 83679T expires Temporary Permit 83208T.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 3.0 cubic feet per second or 427.5 acre-feet annually, but not to exceed 3.0 acre-feet per acre from all sources.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

The well drilled under Permit 75408 will not produce sufficient quantities of water to fully irrigate the 190 acres permitted. Temporary permit 83208T was issued to allow the applicants the ability to drill a test well at the proposed point of diversion to determine if the well at the new site would produce the quantities of water needed. This well has been drilled and is in the process of being equipped. Permit 83208T, while still in good standing, was issued for only a total of 12 acre feet annually. The applicants desire to fully utilize the waters capable of being pumped from the new well to irrigate this coming season. We are filing this temporary application in order to allow the applicants that ability while the permanent application to change this portion of Permit 75408, which is being filed herewith, is being processed and issued. The water under this application and the remaining waters under Permit 75408 are to be co-mingled for the irrigation of 190.0 acres at an annual duty of 570.0 acre feet.
16. Miscellaneous remarks:
We are requesting that temporary Permit 83208T be expired at such time as the Permit under this Application is issued.
