Name of Permittee: REPUBLIC ENVIRONMENTAL TECHNOLOGIES, INC.
Source: UNDERGROUND
Basin: GARNET VALLEY
Manner of Use: INDUSTRIAL AND DOMESTIC
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 67718, is issued subject to the terms and conditions imposed in said Permit 67718 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 83711, 83712, 83713 and 83715, having the same point of diversion Well 2, shall not exceed 105.28 acre-feet annually.

The total combined duty of water under Permits 83707, 83708, 83709, 83710, 83711, 83712, 83713, 83714, 83715, 83716, and 83717, having the same place of use, shall not exceed 468.0 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

(Continued on Page 2)
