

THE STATE OF NEVADA

PERMIT TO APPROPRIATE WATER

Name of Permittee: SIERRA SPRINGS RECREATIONAL PROPERTIES, INC.
Source: UNDERGROUND
Basin: CARSON VALLEY
Manner of Use: RECREATIONAL
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST
Priority Date: 04/18/2014

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, for non-consumptive use, is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the proof of completion of work is filed. The State retains the right to regulate the use of the water granted herein at any and all times.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permit 62509, Certificate 15725; Permit 62510, Certificate 15726; Permit 62872, Certificate 15813; Permit 62873, Certificate 15814 and Permit 83750 shall not exceed 120 acre-feet annually; however, the total combined consumptive duty of water shall not exceed 68.34 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.2 cubic feet per second or 51.66 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

August 22 2015

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

August 22 2017

Map in support of proof of beneficial use shall be filed on or before:

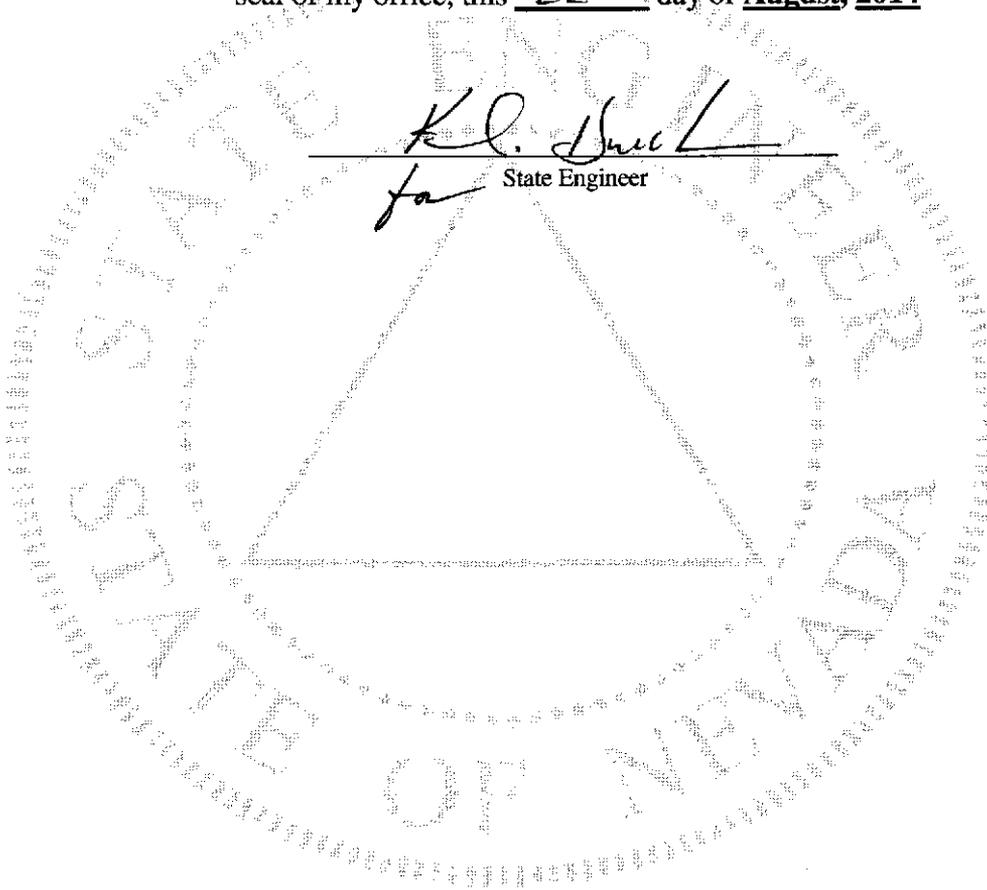

N/A

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 22nd day of August, 2014

ja State Engineer

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY

Date of Filing in State Engineer's Office APR 18 2014

Returned to applicant for correction _____

Corrected Application filed _____ Map filed Oct 29 1996 under 62508

The applicant Sierra Springs Recreational Properties, Inc.
 P.O. Box 19100 _____ of Reno _____
Street Address or P.O. Box City or Town

Nevada 89511 _____ hereby make(s) application for permission to appropriate the
State and ZIP Code
 public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)
Incorporated State of Nevada 3/16/1992

RECEIVED

 STATE ENGINEERS OFFICE

1. The source of water is Underground
Name of the stream, lake, underground, spring or other sources.
2. The amount of water applied for is 0.2 cfs
One second foot equals 448.83 gallons per minute.
 - (a) If stored in a reservoir give the number of acre-feet _____
3. The water is to be used for Recreational Purposes
Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
4. If use is for:
 - (a) Irrigation, state number of acres to be irrigated _____
 - (b) Stockwater, state number and kind of animals _____
 - (c) Other use (describe fully in No. 12) _____
 - (d) Power:
 - (1) Horsepower developed _____
 - (2) Point of return of water to stream _____

Carson Valley Indian Alls
- 10514
 8 D.

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

NE1/4NW1/4 Section 30, T.14N., R.20E., M.D.B. &M., or at a point from which the center west 1/16th corner of Section 19, T.14N., R.20E., M.D.B.&M., bears N26 52'05"W a distance of 2717.1 feet. Use supporting map filed under permit 62508

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

NI/2NW1/4NW1/4 AND THE NI/2NE1/4NW1/4 of Section 30, T.14N., R.20E., M.D.B.&M Use map filed under 62508.

7. Use will begin about January 1 and end about December 31 of each year.
Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

existing well, submersible 20 HP pump, distribution system and totalizing meter

9. Estimated cost of works: \$15,000

10. Estimated time required to construct works: 1 year

(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 3 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

The water will be pumped from an existing well to augment evaporative losses and losses due to water returning to the source from which it was extracted. The water ski lake is unlined and water entering into the lake will leak back into the groundwater aquifer. The NIWR for Carson Valley is 3.7 af/acre X 11.7 acres = 43.29 acre feet would be the actual net consumptive use based upon evaporation calculated for an open water source.

13. Miscellaneous remarks:

This permit and permits, 62509, 62510, 62872, 62873 shall not exceed a net consumptive use total of 68.34 acre feet, with the total allowed net duty not to exceed 120 acre feet per annum considering that approximately 77 acre feet is returning to the source from which the water was diverted. The additional duty represents a probable maximum duty that would be reported by meter readings with the actual consumptive use limited to 68.34 acre feet.
