**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the proof of completion of work is filed. The State retains the right to regulate the use of the water granted herein at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

This permit is also issued subject to the provision that a portion of the place of use of the water herein granted is limited to and supplemental to lands having a claim to surface water under Proof of Appropriation V02391.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.4 cubic feet per second or 508.0 acre-feet annually, but not to exceed 4.0 acre-feet per acre from all sources.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

October 14 2016

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

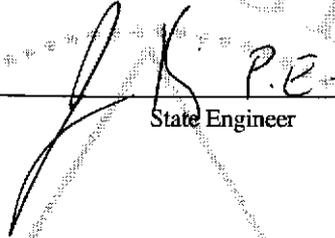

October 14 2017

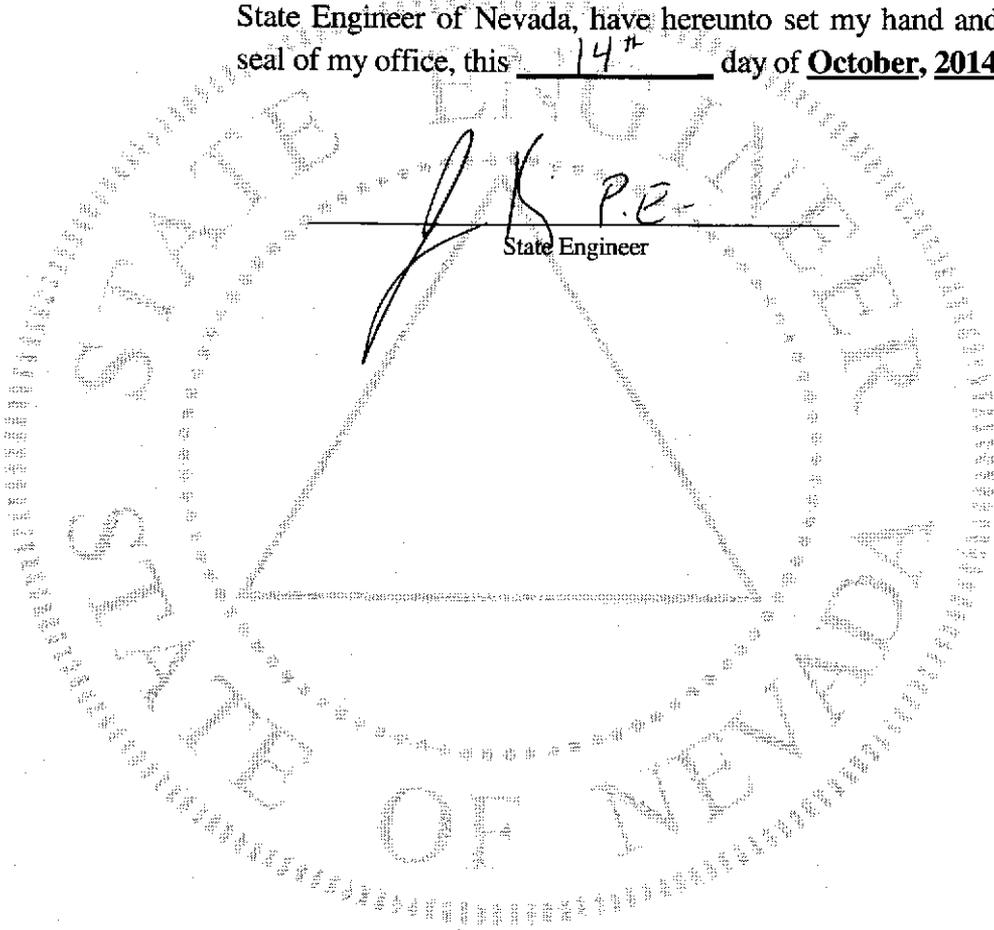

Map in support of proof of beneficial use shall be filed on or before:

October 14 2017

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 14<sup>th</sup> day of October, 2014

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)  
within Tract 37 of Section 4, T. 36 N., R. 26 E., M.D.B.&M., or at a point from which the SW corner of Section 8, T. 36 N., R. 26 E., M.D.B.&M. bears S. 33° 22' 01.2" W., a distance of 11,562.0 feet. (Please see attached map)

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)  
within Tract 37 (Section 4) and Tract 38 (Section 5), T. 36 N., R. 26 E., M.D.B.&M. and within the SE1/4 SE1/4 of Section 32, T. 37 N., R. 26 E., M.D.B.&M. (127 acres total) (Please see attached map).

7. Use will begin about January 1st and end about December 31st of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Proposed works include drilling of well, installation of pump and electrical, installation of any pipelines, ditches, and any other required earthwork

9. Estimated cost of works: \$100,000.00

10. Estimated time required to construct works: 3 years

(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 1 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Well to be drilled. Pump and electrical to be installed. Water will be conveyed from pump through pipelines and ditches to fields were it will be placed to beneficial use for irrigation practices.

13. Miscellaneous remarks:

A portion of the place of use is currently water righted with decreed right V-02391. Portions of this application will be considered supplemental underground water to the decreed water right and the remaining portions will be considered stand alone groundwater rights. Diversion rate of 1.4 c.f.s. is requested since it is anticipated that irrigation will only run half time (182 days out the 365 day year).
