### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion, place and manner of use of the waters of the Truckee River as heretofore granted under Permit 77977, which changed the place of use of a portion of Claim 48, Truckee River-Decree, is issued subject to the terms and conditions imposed in said decree and with the understanding that no other rights on the source will be affected by the change proposed herein. A suitable measuring device must be installed and accurate measurements of water placed to beneficial use must be kept.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is subject to the continuing jurisdiction and regulation by the Federal Water Master and State Engineer.

Pursuant to State Engineer Ruling 6190, and addressed again in Ruling 6279, a construction plan for the induction well must be submitted and approved by the State Engineer prior to construction of this well.

A monthly report shall be submitted to both the Federal Water Master's Office and the Division of Water Resources within 10 days from the end of each month which shall include the amount of water pumped from the induction well and the amount of water used.

This permit abrogates 3.00 acre-feet annually from the base right, as requested. However, pursuant to NRS 533.3703, only the net consumptive use amount being, 1.88 acre-feet as decreed can be diverted.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.016 cubic feet per second or 1.88 acre-feet as decreed

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

October 10 2015

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

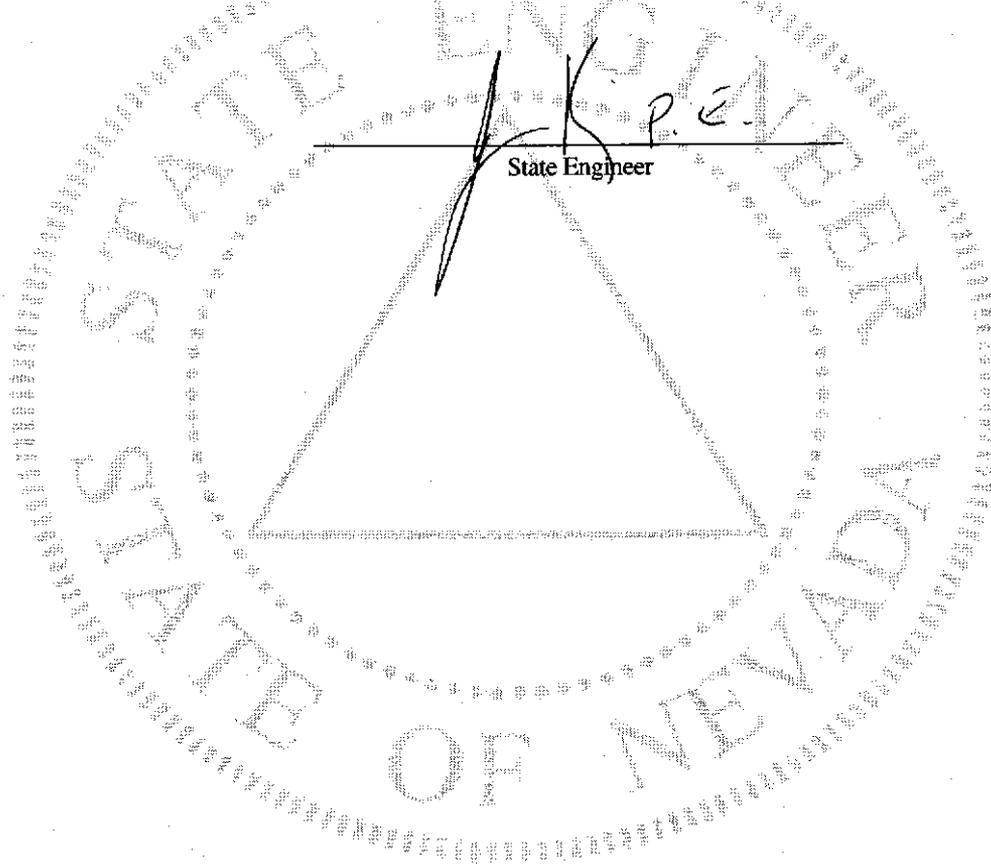

October 10 2019

Map in support of proof of beneficial use shall be filed on or before:
