This permit, to change the point of diversion, place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 68981, is issued subject to the terms and conditions imposed in said Permit 68981 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 84007, 84008 and 84009, having the same point of diversion and being fully supplemental, shall not exceed 69.6 acre-feet annually.
