

THE STATE OF NEVADA
APPLICATION TO APPROPRIATE WATER

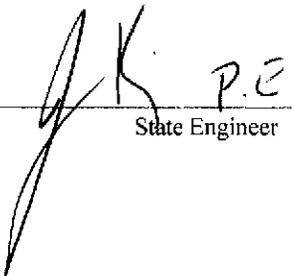

Name of Applicant: GLL PITS LLC
Source: UNDERGROUND
Basin: LOWER REESE RIVER VALLEY
Manner of Use: MINING AND MILLING
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST
Priority Date: 07/29/2014

DENIAL OF STATE ENGINEER

This application is hereby denied on the grounds that the use requested is not temporary and that there is no unappropriated water at the source.

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 13th day of November, 2015.

State Engineer

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR OFFICE USE ONLY
Date of Filing in State Engineer's Office JUL 29 2014
Returned to applicant for correction AUG 08 2014
Corrected Application filed _____ Map filed AUG 20 2014

The applicant GLL Pits LLC
1410 W. Railroad of Winnemucca
Nevada 89445 hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated.

- 1. The source of water is Underground
2. The amount of water applied for is 70AFA at .223cfs
3. The water is to be used for Mining and Milling
4. If use is for:
(a) Irrigation, state number of acres to be irrigated
(b) Stockwater, state number and kind of animals
(c) Other use (describe fully in No. 12)
(d) Power:
(1) Horsepower developed
(2) Point of return of water to stream

RECEIVED

STATE ENGINEERS OFFICE

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

Point of Diversion located within the SE1/4 of the NE1/4 of Section 17, T31N, R44E, MDM, from which the north one-quarter corner of section 17 bears N42 degrees 12' 00" W a distance of 3230 feet.

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

The S1/2 of the NE1/4 of Section 17, T31N, R44E, MDM, being within Basin 59.

7. Use will begin about January 1 and end about December 31 of each year.
Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Drill and complete a water well to an approximate depth of 500 feet.

9. Estimated cost of works: \$150,000

10. Estimated time required to construct works: 2 years

(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 5 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

See attachment

Applicant: GLL Pits, LLC

Attachment to application for permit to appropriate the public waters of the State of Nevada

(12) Description of Proposed Project

GLL Pits, LLC currently operates a gravel pit approximately 7 miles south of the Town of Battle Mountain on State Hwy 305. No water source currently exists at the site. Water for the mining and milling operations has historically been obtained from the Town of Battle Mountain's municipal system and is transported in water trucks to the site. The water trucks off-load the water into a lined pond with a capacity of approximately 50,000 gallons. During a typical work day, two water trucks (2,000 gallon capacity each) are required continuously to keep up with the water demands for the mining and milling operations. Historical usage based on a water truck count for the current average work schedule of 5 days a week for 8 months has been approximately 100,000 gal/day or 53.48AFA which has been less than optimal for the current operations.

The proposed project will consist of drilling and completion of a 8-10 inch water well to an approximate depth of 500 feet. The project would also include the installation of pumping equipment which will be operated with a portable generator. The well head will consist of a flow meter along with approximately 80 feet of discharge piping to direct the water into the adjacent holding pond described above. The preliminary production capacity expected from the new well is approximately 50 – 100 gpm.

(13) Miscellaneous remarks

GLL Pits, LLC currently conducts mining and milling operations at a gravel pit south of the Town of Battle Mountain, 8 -10 months per year as demand for finished aggregate requires. The owners of GLL Pits, LLC intend to use the water at the Place of Use described in the attached application for the life of the operation which is expected to be 35 years or less. GLL Pits, LLC further agrees that if this request or a portion of this request for new appropriation is granted, no transfer of the Place of Use described in the attached application shall occur.
