This permit, to change the point of diversion of the waters of an underground source as heretofore granted under Permit 81294, is issued subject to the terms and conditions imposed in said Permit 81294, and with the understanding that no other rights on the source will be affected by the change proposed herein. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permit 23252, Certificate 7289 and Permit 84245, for the irrigation of 320 acres shall not exceed 1,280 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 2.7 cubic feet per second or 1,280 acre-feet annually, but not to exceed 4.0 acre-feet per acre from all sources.
