

THE STATE OF NEVADA

PERMIT TO CHANGE THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Name of Permittee: 12-3-14 CORP, LLC
Source: UNDERGROUND
Basin: PAHRUMP VALLEY
Manner of Use: CONSTRUCTION
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST
Priority Date: 09/06/2005

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion of the waters of an underground source as heretofore granted under Permit 75317, is issued subject to the terms and conditions imposed in said Permit 75317 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permit 64362, Certificate 16634 (15.15 acre-feet annually for irrigation); and Permits 84423, and 84424 (22.0 acre-feet annually for construction) shall not exceed 37.15 acre-feet annually from this point of diversion.

If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.0286 cubic feet per second or 8.0 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

December 8 2016

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

December 8 2016

Map in support of proof of beneficial use shall be filed on or before:
