#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the place of use of the waters of an underground source as heretofore granted under Permit 80204, is issued subject to the terms and conditions imposed in said Permit 80204 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permits 84501 thru 84511 shall be limited to 763.68 acre-feet annually (AFA) for supplemental underground and surface water, plus 1,293.82 AFA for non-supplemental ground water, for a maximum total combined duty of underground water of 2,057.5 AFA. Supplemental underground water shall not be pumped from the wells described in these permits except to the extent necessary to make up the portion of the entitled duty of surface water under Permits 84505 and 84511 in any given year.

The total acres irrigated by Permits 84501 thru 84511 shall be limited to 190.92 acres from surface water and supplemental underground sources, plus 323.46 acres from non-supplemental underground sources, for a total of 514.375 acres irrigated from all sources within the described place of use.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.784 cubic feet per second or 281.14 acre-feet annually, but not to exceed 4.0 acre feet per acre from all sources.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

**Filed Under 80204 on April 05, 2012**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

**April 14 2018**

Map in support of proof of beneficial use shall be filed on or before:

**April 14 2018**

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 14<sup>th</sup> day of **April, 2015**
