The well is screened from 40' to total depth. This water may be commingled with other surface and groundwater for irrigation and domestic purposes. The pivots may be irrigated with stand-alone and supplemental groundwater. In addition to the pivots, flood irrigation may also be conducted.

16. Miscellaneous remarks:

Surface water will be used to the fullest extent possible to efficiently irrigate the place of use. A portion of this water is supplemental to water appropriated under Permit No. 11759 and Permit No. 11060. The point of diversion is shown as being changed so the record will reflect the actual location of the well rather than approval of a new well location.
