Item No. 15 – Provide a detailed Description of the project and its water usage (use attachments if necessary):

This application is being filed to inter-connect the existing irrigation distribution system to allow for greater system efficiency. Providing the permittee flexibility to manage well and pivot production will also reduce pumpage costs throughout the ranch. Over the next few years, the permittee plans to connect the entire irrigation system based on variable pumpage from production wells. In addition, this application is being filed in order to maintain the total certificated acreage within the East ½ of Section 34, T.26N., R.65E., M.D.M. Proofs of Resumption to Beneficial Use were filed under Permit No. 23897, Certificate 8021, and Permit Nos. 26289, Certificate 8342, but an issue with the property, highway right-of-way and field boundary caused a discrepancy of approximately 24 acres within the existing certificated place of use.

The permittee has an agreement with Samuel Henriod to allow for a minimum of 24 acres to be irrigated within a portion of White Pine Assessor's Parcel Nos. 008-030-06, 008-030-09, 008-030-14, 008-030-15, and 008-110-01. The exact location of this irrigated acreage will be determined upon proof of beneficial use. An application to change all of Permit No. 23897, Cert. 8021, 24181, Cert. 8028, and Permit No. 26289, Cert. 8342, are being filed concurrently to change a total combined duty of 2,294.08 acre-feet annually for the irrigation of 573.52 acres.

The total irrigated acreage under Permit No. 23895, Cert. 8022; Permit No. 23897, Cert 8021; Permit No. 23898, Cert. 8025; Permit No. 23899, Cert. 8005; Permit No. 24181, Cert. 8028; Permit No. 24182, Cert. 8029; Permit No. 26288, Cert. 8353; and Permit No. 26289, Cert. 8342; and change applications of the above rights shall not exceed 1,837.15 acres and not to exceed 4.0 acre-feet per acre, as stated in permit terms. These water right permits will not be commingled with water rights owned by Samuel K. and Clelia J. Henriod.
