

THE STATE OF NEVADA

PERMIT TO CHANGE THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Name of Permittee: DOUGLAS COUNTY
Source: UNDERGROUND
Basin: CARSON VALLEY
Manner of Use: QUASI-MUNICIPAL
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST
Priority Date: 11/02/1990

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the manner of use of the waters of an underground source as heretofore granted under Permit 74451, is issued subject to the terms and conditions imposed in said Permit 74451 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The total combined duty of water under Permit 66912, Certificate 17900; Permits 80988, 80989, 82660 and 84622 shall not exceed 48.07 (36.22 consumptive) acre-feet annually.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

A total of 47.40 acre-feet annually is abrogated from the base right. However, pursuant to NRS 533.3703 only 35.55 acre-feet (the net consumptive use amount) at 0.444 cubic feet per second can be diverted annually. Additional duty up to the total may be granted if it can be shown that this additional duty will not cause the consumptive use amount to be exceeded.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

Filed Under 74451 on December 07, 2011

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

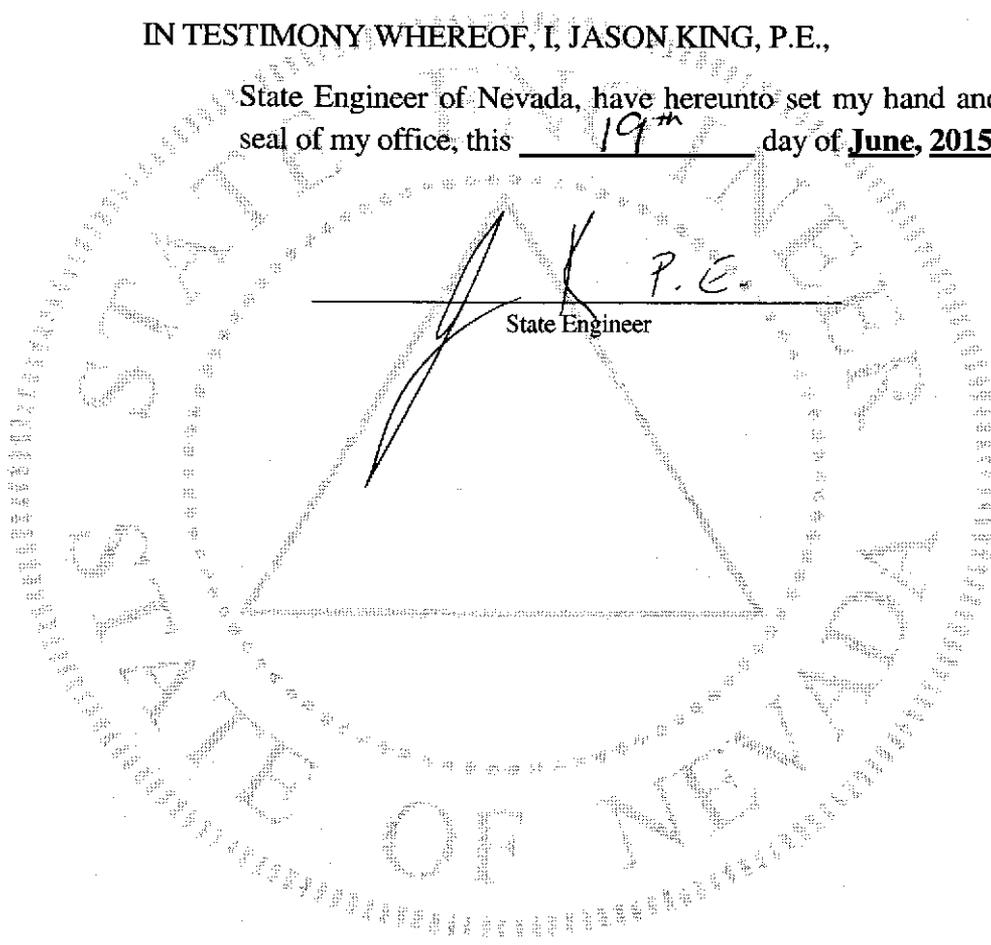

June 19 2018

Map in support of proof of beneficial use shall be filed on or before:

N/A

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 19th day of June, 2015

[Signature]
P. E.
State Engineer

APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

NV 89423 hereby make(s) application for permission to change the
State and ZIP Code

Point of diversion Place of use Manner of use of a portion
of water heretofore appropriated under (Identify existing rights by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and identify right in Decree.)
Permit 74451

1. The source of water is an underground source
Name of stream, lake, underground, spring or other sources.
2. The amount of water to be changed 0.4443 cfs (47.404 afa / 15.447 mga)
Second feet, acre-feet. One second foot equals 448.83 gallons per minute.
3. The water to be used for Quasi-Municipal
Irrigation, power, mining, commercial, etc. If for stock, state number and kind of animals. Must limit to one major use
4. The water heretofore used for Irrigation
If for stock, state number and kind of animals.
5. The water is to be diverted at the following point (Describe as being within a 40-acre subdivision of public survey and by course and distance to a found section corner. If on unsurveyed land, it should be stated.)
No change.
6. The existing point of diversion is located within (If point of diversion is not changed, do not answer.)
Within the SE 1/4 of the SE 1/4 of Section 7, Township 11 North, Range 21 East, M.D.B.&M., at a point from which the SE corner of said Section 7 bears S 25° 00' 00" E, a distance of 900.00 feet. See map on file with State DWR under Permit 70909-T.

CV
-1055V
8 Do

7. Proposed place of use (Describe by legal subdivisions. If for irrigation, state number of acres to be irrigated.)

No Change.

8. Existing place of use (Describe by legal subdivisions. If changing place of use and/or manner of use of irrigation permit, describe acreage to be removed from irrigation.)

See attached Exhibit A. See also map on file with State DWR under Permit 66912.

9. Proposed use will be from January 1 to December 31 of each year.
Month and Day Month and Day

10. Existing use permitted from January 1 to December 31 of each year.
Month and Day Month and Day

11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Completed: See attached Exhibit A. (Not enough space here to type a full and complete description).

12. Estimated cost of works Approximately \$500,000.

13. Estimated time required to construct works Completed: See attached Exhibit A.

If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use 8 - 10 years.

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

See attached Exhibit A.

City, State, ZIP Code

Existing Place of Use:

The Southeast 1/4 of the Southeast 1/4 of the Southeast 1/4 of Section 7;

The West 1/2 of the Northwest 1/4 of Section 17;

The Northeast 1/4 of the Northeast 1/4 of Section 18; a portion of the Northwest 1/4 of the Northeast 1/4 of Section 18; a portion of the Southwest 1/4 of the Northeast 1/4 of Section 18; Township 11 North, Range 21 East, M.D.B. & M.

Item 11 - Description of Proposed Works:

Completed: Well drilled to a total depth of 1,580 feet and constructed with 8-inch diameter steel blank casing and steel quad perforated slotted casing with a wall thickness of 0.3125 inches. The sanitary seal extends from ground surface to a depth of 192 feet. The well was equipped with a 20 hp submersible pump and motor, and magnetic flow meter assembly.

Item 15 - Detailed Descriptions of Proposed Project and Water Usage:

The Camp currently has 12 buildings in various stages of repair and program areas needing attention that impact water demands. The following is a list of anticipated needs:

Camp Currently employs 50 staff with the potential to employ 5 additional staff beginning July 1, 2015.

CSYC dormitory The dormitory houses 41 male youth. The dormitory is in need of repairs to the plumbing, electrical, fire safety/suppression systems. The Camp anticipates adding offices, laundry facilities and programming areas to the existing structure.

McKibben

McKibben is being remodeled to house administration staff. Construction expected to be completed April 2015..

Gymnasium

This building is in need of repairs.

1. There is a non-operational shower area with 10 shower stalls. Current plans include repairing this shower area.
2. There is a functioning unisex toilet area, which will be remodeled to include gender specific facilities. Increasing the number of toilets from 2 to 4, increasing urinals from 1 to 2, and increasing hand sink from 1 to 4.
3. The Gymnasium remodel will also include the addition of a cleaning area with floor mop sink with water supply.

Vocational Building

The vocational building will be remodeled to include:

1. Water supply to sink for screen cleaning (silk screening).
2. Bathroom toilets 2 to 4 and sinks 2 to 4 for use by the youth.
3. Fire suppression upgrades.

Bird Hatchery

Repair, remodel and upgrades to all water supply features including irrigation, hose access and fire suppression.

Barn

Repair, remodel and upgrade the barn facilities to a "shop" for bike repair and storage. Increasing hoses, fire suppression, and cleaning areas.

Exhibit A

<u>Aurora Pines Dorm</u>	Increase youth daily population from 16 to 24.
<u>Kitchen</u>	Remodel or build new kitchen facilities for increased youth and staffing populations. Improve the laundry and cleaning areas with increased access to water use.
<u>Greenhouse</u>	Current operations are limited to a 6-month growing season. Increase the usage to a year round program therefore increasing the use of water.
<u>Administration</u>	Remodel to include break area for staff and additional offices for staff.
<u>Jacobsen Hall</u>	Remodel to include bathroom areas: 2 to 4 toilets, 2 to 4 sinks and 2 to 4 showers.
<u>Case Manager Building</u>	Remodel to add additional bathroom and toilet facilities. Remodel may also include adding intake area with a shower.
<u>Solar Panels</u>	Fully functional with need to add a cleaning schedule for washing panels on regular interval. Project completed as of November 2012.
<u>Baseball Field</u>	Rejuvenate by adding field for use by the youth. Rejuvenation will add lawn with the need for irrigation.
<u>Landscaping</u>	Adding drip lines, irrigation lines, timers. Current landscaping is minimal with no real water use. We are adding trees, scrubs and flowers to all building areas.

Exhibit A

Biofuel Program Grow cattails for the purpose of creating a biofuels program at the camp. Increasing the need for water usage.

Carson Valley Trap Club Informal requests to be added as a user to the Camp water system.

Item 16 - Miscellaneous Remarks:

The China Spring Youth Camp/Aurora Pines Girls Facility (Camp) is a 57 bed facility.

The Camp is open year round 24 hours a day.

The Camp has many areas in need of renovation, repair and upgrades. Many of these renovations, repairs and upgrades will impact water usage at the facility. Currently there are three buildings not being used or occupied until repairs can be made. All buildings need upgrades to bathroom facilities. Many changes will be made to the Camp as funding becomes available, to improve the bathroom and shower areas.

Other changes and improvements include adding staff, youth, irrigation, and landscaping to the facility and grounds. All program areas for animals have been closed until repairs and additional water can be provided to the animal's areas.

The existing well and point of diversion provides water supply for the China Spring Youth Camp. The manner of use is being changed to reflect that water is used not only for Irrigation but also for Quasi-Municipal purposes.
