This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion, place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 76719, is issued subject to the terms and conditions imposed in said Permit 76719 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The total combined duty of water under Permit 54244, Certificate 15038; Permit 54245, Certificate 15037; Permits 76719, 82658, 82659 and 84713 shall not exceed 1,981.32 AFA.

The issuance of Permit 84713 shall expire Temporary Permit 84251T.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

A total of 170.4 acre-feet annually is abrogated from the base right. Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **February 27, 2018**
