#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion of the waters of an underground source as heretofore granted under Permit 81672, is issued subject to the terms and conditions imposed in said Permit 81672 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permits 81667, 81668, 81669, 82674, 84743, 84744, 84745, 84746 and 84730T shall not exceed 1,520.1 acre-feet annually. However, pursuant to NRS 533.3703, initially only the net consumptive use amount of 1,200.69 acre-feet can be diverted annually. Additional diversion up to the total of 1,520.1 acre-feet may be allowed if it can be shown that the additional diversion will not cause the consumptive use to be exceeded.

The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the groundwater basin.

(Continued on Page 2)

Monthly records shall be kept of the following and reported within 15 days after the end of each quarter:

- A. The total volume of water pumped from each diversion in acre-feet.
- B. The maximum flow rate from each diversion in cubic feet per second.
- C. The pumping water level from each well in feet above mean sea level.
- D. The volume of water consumptively used for mining and milling in acre-feet.
- E. The amount of water diverted to the infiltration or injection sites, if any, in acre-feet.
- F. The amount of water lost through evaporation or other system losses project wide.

The State Engineer may require additional monitoring should conditions warrant such modification.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

A total of 240.0 acre-feet annually is approved under this permit and is abrogated from the base right. However, pursuant to NRS 533.3703, **initially only 162.0 acre-feet (the net consumptive use amount) at 1.012 cubic feet per second can be diverted annually.** Additionally, duty up to the total of 240.0 acre-feet may be allowed if it can be shown that this additional duty will not cause the consumptive use amount to be exceeded.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

May 12 2016

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

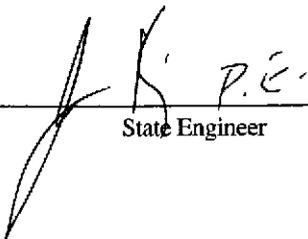

May 12 2018

Map in support of proof of beneficial use shall be filed on or before:

Month and Day Month and Day

11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Drilled and cased well, pump, motor and distribution system. Water will be conveyed by pipeline or hauled by truck as needed.

12. Estimated cost of works in excess of \$250,000

13. Estimated time required to construct works 1 year

If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use 5 years

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

These water rights are under lease to Midway Gold US Inc. for their Pan Mine Project, as outlined in lease agreements on file with the Division of Water Resources under Applications 81667-81674. This water will be used for mine exploration and open pit mining and milling of gold ores. The Mining Appropriation Data for the Pan Gold Mine is on file under Applications 81667-81674. This Application seeks to change mining Permit 82672, which changed mining Permit 81672, which changed a portion of irrigation Permit 23508, Certificate 6838. It is anticipated that the right will eventually be changed back to its base right irrigation use after completion of this limited term mining project.

16. Miscellaneous remarks:

This Application is being filed to change the point of diversion to the actual location of Well PW-2.
