This permit, to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 57458, Certificate 16542, is issued subject to the terms and conditions imposed in said Permit 57458, Certificate 16542 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permit 76136, Certificate 1865I and Permit 84760, having the same point of diversion and place of use, shall not exceed 5.0 acre-feet annually.
