#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 81413, is issued subject to the terms and conditions imposed in said Permit 81413, and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permits 57058, 57059, 57060 and 84915 shall not exceed 1080.065 acre-feet for the irrigation of 270.02 acres.

Water under this permit is comingled with portions of the waters of Vested Right 01163; Permit 10107, Certificate 3001; Permits 57058, 57059, 57060 and 84915 for the irrigation of 270.02 acres with the proposed place of use.

Permit 84915 is issued and must remain entirely supplemental to existing surface water rights currently under V01163 (White River Decree) and Permit 10107, Certificate 3001, and as such cannot be pumped unless there is insufficient surface water available.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.13 cubic feet per second or 20.865 acre-feet annually and shall not exceed 4 acre-feet per acre of land from all sources.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

**Filed Under 81413 on August 17, 2015**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

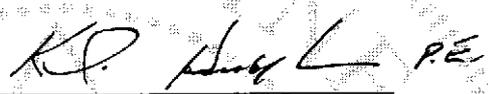

**September 28 2018**

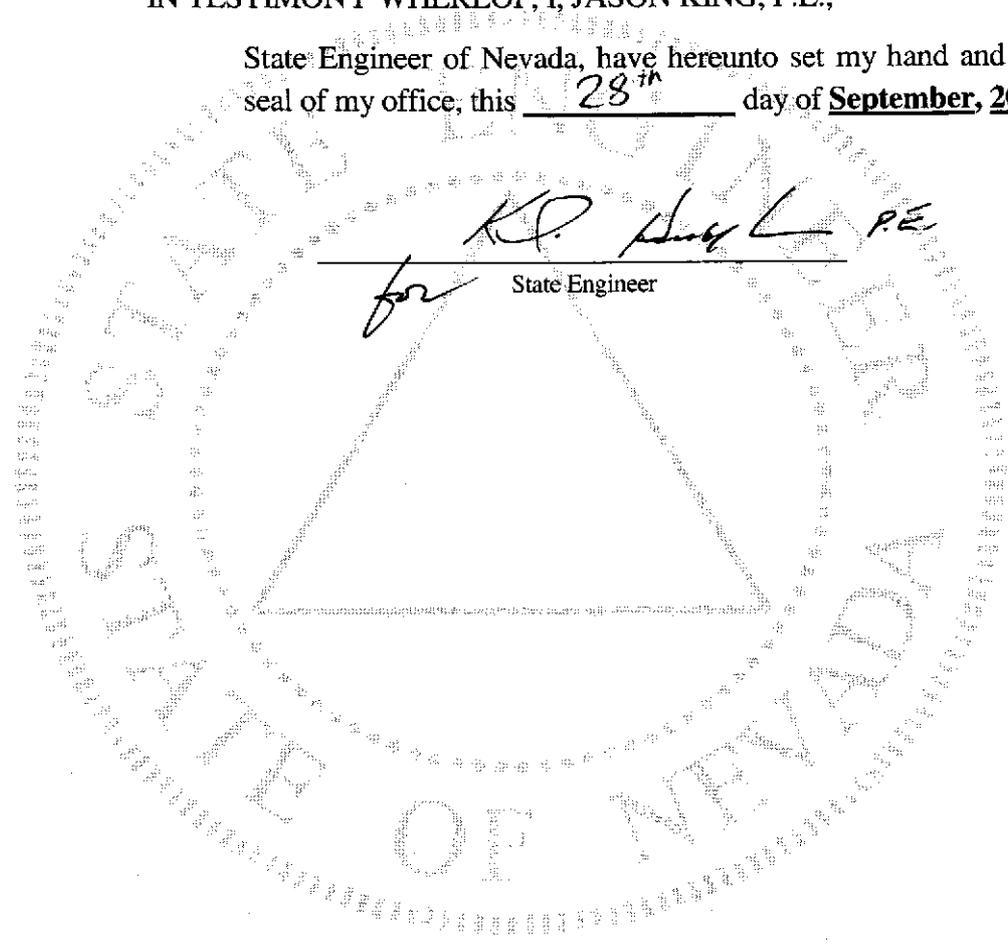

Map in support of proof of beneficial use shall be filed on or before:

**September 28 2018**

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 28<sup>th</sup> day of **September, 2015**
