#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 78419, is issued subject to the terms and conditions imposed in said Permit 78419 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permits 81970, 84973, and 84974 shall not exceed 1,872.0 acre-feet annually for the irrigation of 468 acres within the described place of use.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.35 cubic feet per second or 288.0 acre-feet annually for the irrigation of 72 acres within the described place of use, but not to exceed 4.0 acre feet per acre from all sources.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

Filed Under 81970 on May 29, 2015

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

November 10 2018

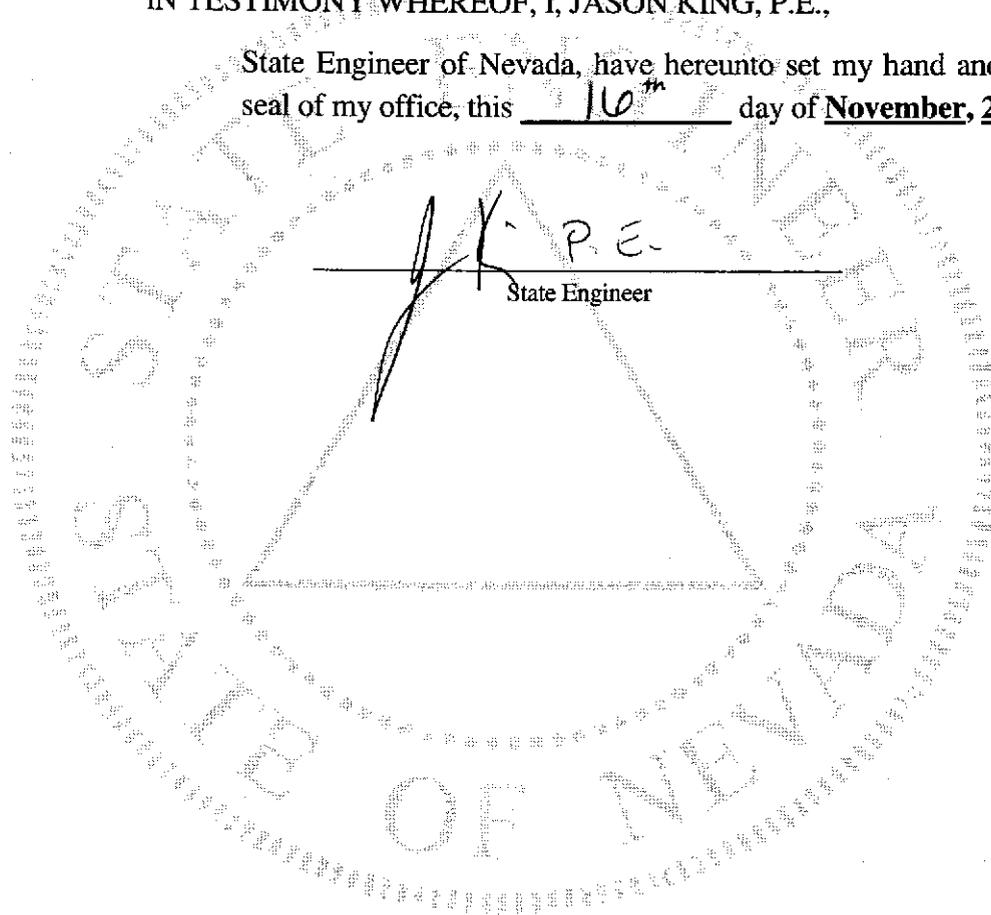

Map in support of proof of beneficial use shall be filed on or before:

November 10 2018

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 10<sup>th</sup> day of November, 2015

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary):(Failure to provide a detailed description may cause a delay in processing)  
The applicant is currently irrigating approximately 8 acres from the well under Permit 78419. There is no power available at the point of diversion under Permit 78419 and the well is currently powered by a diesel generator. We are filing this application to change the point of diversion of the majority of the acreage permitted under Permit 78419 due to the fact that the applicant has determined that it will be more convenient and cost effective to irrigate this acreage from a well that currently has power installed rather than incurring the cost to bring power to the well under Permit 78419. He plans to install a pump capable of being powered by solar panels to irrigate the 8 acres currently being irrigated from the well under Permit 78419. This application changes the majority of the acreage allowed under Permit 78419 to the well permitted under Permit 81970. The waters under this application, the waters under the application changing Permit 78260 being filed herewith and the waters under Permit 81970 are to be co-mingled at a total duty of 1872.0 acre feet for the irrigation of 468.0 acres within the proposed and permitted place of use.
