The applicant SFG, LLC

P.O. Box 368 of Wells
Street Address Or P.O. Box City or Town

Nevada 89835 hereby make(s) application for permission to appropriate
State and Zip code No.

the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association give names of members.)

July 30, 2007 in Nevada

1. The source of water is Underground
Name of stream, lake, underground, spring or other sources
2. The amount of water applied for is 0.20 cfs
One second foot equals 448.83 gallons per minute.
 - (a) If stored in reservoir give number of acre-feet _____
3. The water to be used for Industrial
Irrigation, power, mining, commercial, domestic or other use. Must limit to one major use.
4. If use is for:
 - (a) Irrigation, state number of acres to be irrigated _____
 - (b) Stockwater, state number and kind of animals _____
 - (c) Other use (describe fully in No. 12) _____
 - (d) Power:
 - (1) Horsepower developed _____
 - (2) Point of return of water to stream _____

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

SE1/4 NE1/4 of Section 25, T.32 N., R.55 E., M.D.B. & M., at a point from which the East 1/4
Corner of said Section 25 bears S 49° 28' 52" E, 80.85 feet.

6. Place of use (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

Portions of the E1/2 NE1/4 and portions of the NE1/4 SE1/4 of Section 25, T.32 N., R.55 E.,
M.D.B. & M., being Parcel 3 as shown on the Parcel Map for Nevada Land and Resource Co.,
LLC on file in the Office of the Elko County Recorder, Elko, Nevada as File No. 496406.
(APN 006-070-017)

7. Use will begin about January 1st and end about December 31st of each year.
Month and Day Month and Day

8. Description of proposed works (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with pump and motor, etc.)

Drilled Well, pump, motor, pipelines, storage tank and storage pond.

9. Estimated cost of works: \$10,000.00

10. Estimated time required to construct works: 3 years
If well completed, describe works.

11. Estimated time required to complete the application of water to beneficial use 5 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary):
(Failure to provide a detailed description may cause a delay in processing.)

Drilled well with pump, motor, pipelines, storage tank and storage pond thence via pipelines to a
sand washing, screening and crushing facility.

13. Miscellaneous remarks:

The waters under this application are to be used for site dust control, sand washing, crushing,
And screening facility and a small office with restrooms. See attached sheet for an explanation of
The annual consumptive use and description of the project.

Application to Appropriate Water
For SFG, LLC
Question 15. Remarks

The waters under this application are to be used for site dust control, sand washing, crushing and screening facility and a small office with restrooms,

The annual consumptive use under this application at total build out is estimated as follows:

The waters under this application will be diverted from the well via pipelines to fill a storage tank and thence via pipelines to the sand washing, crushing, and screening facility. The waters utilized in the facility will then be transferred to a small storage pond to be recycled to the plant for re-use. An estimated 8,000 gallons per day of the water will be consumptive that includes evaporation and absorption into sand and rock.

Site dust control = 10, 000 gallons per day

The crushing and screening plant requires dust control at all transfer points in the plant at a maximum rate of 20 gallons per minute for an 8 hour work day which equates to 9,600 gallons per day.

Office restrooms and miscellaneous use is estimated at 500 gallons per day.

It is estimated that the plant will be used 5 days a week for 52 weeks annually.

Total consumptive use will be 28,100 gallons per day for 260 days per year, which equates to 22.42 acre feet annually.
