#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion, place and manner of use of the waters of the Truckee River as heretofore granted under Permit 16768, Certificate 4580, which changed the point of diversion, place and manner of use of a portion of Claim 388, Truckee River Decree, is issued subject to the terms and conditions imposed in said decree and with the understanding that no other rights on the source will be affected by the change proposed herein. A suitable measuring device must be installed and accurate measurements of water placed to beneficial use must be kept.

This permit is subject to the continuing jurisdiction and regulation by the Federal Water Master and State Engineer.

This permit abrogates 106.80 acre-feet annually from the base right, as requested. However, pursuant to NRS 533.3703, only the net consumptive use amount being, 66.75 acre-feet as decreed can be diverted.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.58 cubic feet per second or 66.75 acre-feet as decreed.**
