

**TEMPORARY**  
**THE STATE OF NEVADA**

**PERMIT TO CHANGE THE PUBLIC WATERS OF THE  
STATE OF NEVADA HERETOFORE APPROPRIATED**

**Name of Permittee:** COTTONWOOD SPRINGS, LLC  
**Source:** UNDERGROUND  
**Basin:** CHURCHILL VALLEY  
**Manner of Use:** QUASI-MUNICIPAL AND DOMESTIC  
**Period of Use:** ONE YEAR FROM DATE OF ISSUANCE.  
**Priority Date:** 07/30/1973

\*\*\*\*\*

**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit, to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit 72619, is issued subject to the terms and conditions imposed in said Permit 72619 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The total combined consumptive duty of water under Permits 36636, 36637, 36638, 36639, 36640, 62912, 62913, 60749, 60751, 60752, 60753, 62586, 66171, 66172, 66173, 72096, 72097, 72438, 72619, 73525 and 85964T shall not exceed 4,550.56 acre-feet annually. This total combined duty includes only 691.2 acre-feet of water, that portion represented as the consumptive use amount of the irrigation base right as changed by Permit 72619, that can be diverted. The permittee may divert up to the entire 864 acre-feet requested under Permit 72619 if it can be shown to the satisfaction of this office, that the Quasi-Municipal (QM) use is also recharging the basin. A water use plan must be submitted and approved prior to any credit being given above and beyond the 691.2 acre-feet, which will allow for a total combined duty of water, under the above referenced permits, up to a maximum of 4,723.36 acre-feet annually.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire 1 year after the approval of the permit at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(Continued on Page 2)

The issuance of Temporary Permit 85964T limits the available water in Permit 72619 to 1.33 cubic feet per second and 962.9 acre-feet annually.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 1.734 cubic feet per second or 391.2 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

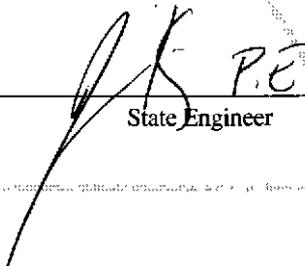

N/A

Map in support of proof of beneficial use shall be filed on or before:

N/A

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 17<sup>th</sup> day of May, 2016

STATE ENGINEERS OFFICE

1. The source of water is underground  
Name of stream, lake, underground, spring or other sources.
2. The amount of water to be changed 1.734 cfs, not to exceed 391.2 acre-feet per year (consumptive)  
Second feet, acre-feet. One second foot equals 448.83 gallons per minute.
3. The water to be used for Quasi-Municipal & Domestic  
Irrigation, power, mining, commercial, etc. If for stock, state number and kind of animals. Must limit to one major use
4. The water heretofore used for Quasi-Municipal & Domestic  
If for stock, state number and kind of animals.
5. The water is to be diverted at the following point (Describe as being within a 40-acre subdivision of public survey and by course and distance to a found section corner. If on unsurveyed land, it should be stated.)  
Lot 7, Section 6, T.18N., R.24E., M.D.M., or at a point from which the SW Corner of said Section 6 bears N. 47 degrees, 55' 04" E., a distance of 808.39 feet.
6. The existing point of diversion is located within (If point of diversion is not changed, do not answer.)  
SE1/4 NE1/4, Section 19, T.18N., R.24E., M.D.B.&M., or at a point from which the NE Corner of said Section 19 bears N. 19 degrees 48' 45" E., a distance of 1701.68 feet.

8-102  
L4

7. Proposed place of use (Describe by legal subdivisions. If for irrigation, state number of acres to be irrigated.)

See Attachment A, Permit 72619

8. Existing place of use (Describe by legal subdivisions. If changing place of use and/or manner of use of irrigation permit, describe acreage to be removed from irrigation.)

See Attachment A, Permit 72619

9. Proposed use will be from January 1 to December 31 of each year.  
Month and Day Month and Day

10. Existing use permitted from January 1 to December 31 of each year.  
Month and Day Month and Day

11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Drilled and cased well 8-inch diameter well, drilled to 475 feet in depth, equipped with a submersible pump, meter, and discharge system.

12. Estimated cost of works \$200,000

13. Estimated time required to construct works 4 months

If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use 1 Year

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary); (Failure to provide a detailed description may cause a delay in processing.)

This application transfers a portion of the consumptive use duty of Permit 72619, along with a proportional share of the diversion rate to a new well 8-inch diameter well drilled under W-693, to be temporarily used for non-potable water supply within the proposed place of use, including construction, earthwork, and dust control.

16. Miscellaneous remarks:

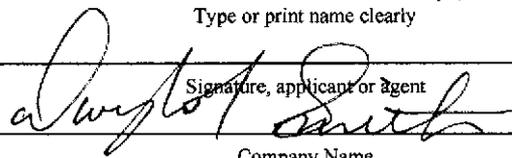

Please refer to supporting maps on file for Permit 72619 for the existing point of diversion and place of use.
