**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 58565, Certificate 14153, is issued subject to the terms and conditions imposed in said Permit 58565, Certificate 14153 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined duty of water under Permit 45425, Certificate 19033; Permit 45426, Certificate 19034; Permit 45930, Certificate 19035; Permit 45931, Certificate 19036; Permit 67212, Certificate 19037; Permit 80165, Certificate 19810; Permits 83950, 84127, 84128, 84214, 84215, 84543, 84544, 86079, 86080, 86081 and 86082 shall not exceed 173.39 acre-feet annually.

If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

This permit is issued for quasi-municipal purposes within the described place of use, further identified as Clark County Assessor's Parcel Numbers 177-01-502-020 and 177-01-602-030.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.02 cubic feet per second or 3.069 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

October 26 2017

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

October 26 2019

Map in support of proof of beneficial use shall be filed on or before:
