This temporary permit, to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit 19983, Certificate 6731, is issued subject to the terms and conditions imposed in said Permit 19983, Certificate 6731 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins. If the well is flowing, a valve must be installed and maintained to prevent waste. In the event that 4.0 acre-feet per acre is delivered from surface sources, this supplemental underground right shall not be pumped.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on December 31, 2016, at which time all rights herein granted shall revert to the right being changed by this temporary permit.

The point of diversion and place of use are as described on the submitted application to support this permit.
