8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Existing well, pump, meter and ditch distribution system. See Permit 83078.

9. Estimated cost of works: Existing

10. Estimated time required to construct works: Existing
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: Three (3) years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

This application would facilitate the delivery of the 1447.9 acre feet permitted by Permit 57867. This water is used for irrigation of 401 acres within Section 22, T.14N., R.25E., M.D.M.

13. Miscellaneous remarks:

This appropriation for diversion rate only would provide the permittee with the ability to improve timely delivery of water when needed and allowed. More importantly, the existing well for Permit 57867 is now 20 years old and there is concern that there is potential for failure of the well in the future. This permit would provide some insurance against the loss of a crop should the well under Permit 57867 fail.
