11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Water will be diverted from the well via solar powered pump.

12. Estimated cost of works \$15,000

13. Estimated time required to construct works Two to three years.

If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use One year after construction.

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

The well will be deepened to access the current groundwater level, a solar pump will be installed, and water will be pumped to an adjacent area of approximately 8,120 square feet (0.184 acres) to create an artificial wetland/ meadow which will provide improved habitat for sage grouse and other wildlife. This area is based on the application of four feet of water per acre to create the artificial wetland/ meadow habitat. If a greater or lesser depth of water is needed, the area of wetland/ meadow created may vary.

16. Miscellaneous remarks:

The change in POD described above reflects more accurate location information from recent surveys. The location of the existing well has not changed.
