ADJUDICATION OF

ALL SPRINGS IN

OLINGHOUSE CANYON

WASHOE COUNTY, NEVADA

****

Presented herewith is the Preliminary Order of Determination defining the rights to the waters of all springs in Olinghouse Canyon in Washoe County, Nevada.

This Preliminary Order is prepared under the Provisions of Chapter 533 of NRS.

PETER G. MORROS
State Engineer

Made, filed and caused to be entered of record in the Office of the State Engineer, this 6th day of February, 1987.

CERTIFICATION OF STATE ENGINEER

I, Peter G. Morros, State Engineer of the State of Nevada, duly appointed and qualified, having charge of the records and files of the office of the State Engineer, do hereby certify that the following is a full, complete and true copy of the Preliminary Order of Determination in and to the waters of all springs in Olinghouse Canyon in Washoe County, Nevada.

This Preliminary Order of Determination was prepared and filed in this office on the 6th day of February, 1987.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my seal of office at Carson City, Nevada this 6th day of February, 1987.

IN THE MATTER OF THE DETERMINATION OF) THE RELATIVE RIGHTS IN AND TO THE) WATERS OF ALL SPRINGS IN OLINGHOUSE) CANYON IN WASHOE COUNTY, NEVADA.)

I. GENERAL

On June 26, 1981, a petition was submitted to the State Engineer by Dennis W. Smith and Ted Y. Smith requesting the determination of the relative rights of claimants to the waters of certain springs in the Olinghouse Mining District, Washoe County, Nevada.

On August 6, 1981, an answer and counterclaim was filed by H. L. Murphy and Georgia V. Murphy who objected to an adjudication of water rights on the grounds that: 1) petitioners failed to identify the "certain patented mining claims" sufficiently to determine if said petitioners are the owners and successors in interest to the rights of pipelines and waters used in conjunction with said claims; 2) that H. L. Murphy and Georgia V. Murphy deny all allegations contained in the petition for adjudication except that they are utilizing water from certain springs for which they hold lawful permits; and 3) any and all rights which may have accrued in predecessors in interest to the petitioners have been abandoned.

On August 26, 1981, a field investigation conducted by the State Engineer's Office disclosed that springs within Olinghouse Canyon had been placed to beneficial use for mining, milling, stockwatering, irrigation and domestic purposes.

On March 15, 1982, the State Engineer entered an order granting the petition to adjudicate certain springs in Olinghouse Canyon and to proceed with the adjudication of the relative rights of the various claimants in accordance with Chapter 533 NRS.

II. CLAIMANTS

A field investigation was conducted by the State Engineer's Office on September 24, 1985, to locate the various claims of vested rights that had been filed pursuant to the Order for Taking Proofs in this adjudication.

Proof 01126 was filed by Joseph Heimrich on August 8, 1912, claiming a vested right to the waters of Sheehan Springs to irrigate three acres of land. A priority date of 1903 is claimed. A supporting map was filed on June 24, 1914, under Permit 2746. The present owners of record are Kathleen Giroux and Edward Charles Clemmons (1/2 interest) and Louis Garaventa (1/2 interest).

Proof 03229 was filed by Marco W. DePaoli, Louis J. DePaoli, Ralph A. DePaoli, Harold P. DePaoli and Raymond D. DePaoli, dba DePaoli Bros., on August 22, 1979, claiming a vested right to the waters of Sheehan Springs 1, 2 and 3 for stockwatering of 65 head of cattle. A priority date of "before 1900" is claimed. Amended Proofs 03229 A, 03229 B and 03229 C and supporting map were filed by Harold P., Norma K., Rena J., Edward L. and John A. Depaoli and Jack M. Bowers on October 1, 1984, claiming a vested right to the waters of Sheehan Springs 1, 2 and 3 for stockwatering of 1500 head of cattle. A priority date of "prior to 1905" is claimed. See Proofs 04193 through 04199 for determination of vested right in this order.

Proofs 04163, 04164 and 04165 and supporting maps were filed By Greenhill (Olinghouse) Development Company on June 27, 1984, claiming a vested right to the waters of Sheehan Springs 1, 2 and 3 for mining, milling and domestic purposes. A priority date of "prior to 1905" is claimed. Observations in a field investigation report dated January 16, 1943, and subsequent State Engineer's Ruling dated February 14, 1944, regarding protested Application 10737 indicates that Sheehan Springs 1, 2 and 3 were not the source of vested rights for Olinghouse Mining Company. In this order, vested rights are not established for Proofs 04163, 04164 and 04165.

Proofs 04166, 04167, 04168 and 04169 were filed by Greenhill (Olinghouse) Development Company on June 27, 1984, claiming a vested right to the waters of Springs 1, 2 and 3 and Williams Spring, respectively, for mining, milling and domestic purposes. A priority date of "prior to 1905" is claimed. There are no records on file with the State Engineer's office that indicate the amount of water claimed under a vested right for mining and milling purposes from these sources by Greenhill (Olinghouse) Development Company and its predecessors. Accordingly, no amount of water is established for those purposes in this order. However, a domestic use is granted under Proofs 04166, 04167, 04168 and 04169 in an amount of 1800 gallons of water per day per claim.

Proofs 04193, 04194, 04195, 04196, 04197, 04198 and 04199 and supporting map (under Proof 03229), were filed by Harold P., Norma K., Rena J., Edwin L. and John A. Depaoli and Jack M. Bowers, dba DePaoli Bros, on October 1, 1984, claiming a vested right to the waters of Unnamed Springs No's. 4, 5, 6, 8, 10, 11 and 12, respectively, for stockwatering of 1500 head of cattle at each spring source. A priority date of 1874 is claimed. Evidence submitted by the applicant indicates extensive historical use of the entire Pah Rah Range for cattle grazing by the DePaoli Bros. and their predecessors. It is not shown that the number of cattle within the drainage of Olinghouse Canyon ever reached as high as 1500 head from 1874 to 1905 by one or more of the earlier ranching operations including the DePaoli Bros. Indeed, the number of cattle claimed on Proofs 03229 and 04200 through 04212 appears to be closer to the limited resources of this particular drainage and which has been recognized under current grazing allotments. For these reasons, a vested right for 130 head of cattle and/or horses for each Proof No's. 03229 A, 03229 B, 03229 C, 04193, 04194, 04195, 04196, 04197, 04198 and 04199 is granted in this order.

Proofs 04200, 04201, 04202, 04203, 04204, 04205, 04206, 04207, 04208, 04209, 04210, 04211 and 04212 and supporting map were filed by Gary G. Garaventa and Karen Garaventa Baggett on October 1, 1984, claiming a vested right to the waters of Sheehan Springs No's. 1, 2 and 3; Unnamed Springs No's 1, 2, 3, 6, 7, 8, 9, 10, 11 and 12, respectively, for stockwatering 90 cattle and 40 horses at each spring source. A priority date of "prior to 1905" is claimed. Since the evidence submitted on behalf of the DePaoli Bros. documents the Garaventa Land Company having at least two of the same predecessors in interest as the DePaoli Bros., the priority for the forementioned proofs are given the same year in this order.

Proofs 04226 and 04227 were filed by Harold P., Norma K., Rena J., Edwin L. and John A. DePaoli and Jack M. Bowers, dba DePaoli Bros., on October 30, 1984, claiming a vested right to the waters of Olinghouse Canyon Creek and an Unnamed Spring, respectively, for stockwatering of 1500 head of cattle at each spring source. A priority date of 1874 is claimed. A supporting map was filed On March 24, 1986. For the same reasons given under Proof 04193, et al., a vested right for 130 head of cattle and/or horses under Proofs 04226 and 04227 is granted in this order.

III. SOURCE

Olinghouse Canyon adjudication includes all springs within the drainage and the waters of Olinghouse Canyon Creek.

The headwaters of the system are Sheehan Springs and various unnamed springs located on the crest of the east slope of the Pah Rah Range south of Pyramid Lake at an elevation of approximately 6,800 feet. The watershed flows in an easterly direction toward Dodge Flat and is wholly contained within Washoe County, Nevada. Perennial springs and early snow melt contribute to the flow of the drainage.

IV. PERIOD OF USE

The period of use shall begin on January 1st and extend to December 31st of each year.

V. DUTY OF WATER

The annual duty of water on lands irrigated from Sheehan Springs is herein fixed and shall not exceed:

ALL CLASSES ..... 4.0 acre-feet per annum

VI. DIVERSION OF WATER AND METHOD OF USE

Claimants for irrigation waters shall have the right to divert up to 2.5 c.f.s. of water per hundred acres of land irrigated but not to exceed the seasonal duty as established under Article X, Rights of Appropriation.

Claimants or their successors in interest will not be required to take or use the amount of water allotted to them in a continuous flow but may cumulate the same or any part thereof in rotating or periodic turn within the seasonal limits with the approval of the Water Commissioner and subject to the control and direction of the State Engineer.

VII. MEASUREMENT OF WATER

All measurements of water diverted are to be made at the source. The claimants shall install and maintain, at their own expense, substantial and easily operated measuring devices. Due allowance for losses will be made by the State Engineer in the event it becomes necessary.

Priorities are fixed by years and where the years are the same, the priorities are equal.

VIII. STOCKWATERING, DOMESTIC, MINING AND MILLING

The right to the diversion and use of water for stockwatering, domestic, mining and milling purposes shall be continued by the claimants named herein or their successors in interest at any time during the year except as otherwise specified herein and such diversions shall be according to the dates of priority limited to the quantity of water reasonably necessary for such use.

The amount of water diverted and used for stockwatering purposes shall not exceed 0.00000625 c.f.s. per head of sheep or 0.00003125 c.f.s. per head of cattle or horses, said quantity to be delivered to the place of use when necessary for this purpose.

The amount of water diverted and used for domestic purposes shall not exceed 1800 gallons per day, said quantity being delivered to the place of use.

IX. CHANGE OF PLACE OF USE

All water allotted under this order shall be appurtenant to the place of use designated herein. Any water user desiring to change the point of diversion, manner of use or place of use of the waters allotted herein must make an application to the State Engineer for permission to make a change pursuant to NRS 533.345.
