Through an on-site inspection made on August 31, 1987 of your dam and reservoir at Camp We-Che-Me, we have determined the dam to be unsafe and a threat to public safety and private property. Under authority of NRS 535.030 you are hereby directed to release all stored water in the reservoir and cease any storage of water until such time as repairs are made on the dam to the satisfaction of the State Engineer. When repairs are completed the State Engineer will make an on-site inspection to determine if the dam can safely store water.
