

IN THE MATTER OF APPLICATION 36403 )  
FILED TO APPROPRIATE THE WATERS OF ) R U L I N G  
AN UNDERGROUND SOURCE IN CARSON )  
VALLEY, DOUGLAS COUNTY, NEVADA )

105

INTRODUCTION

Application 36403 was filed to appropriate water from an underground source in the Carson Valley Ground Water Basin, Douglas County, Nevada.

In 1975 Water Resources Reconnaissance Series Report 59 Water Resource Appraisal of the Carson River Basin, Western Nevada by Patrick A. Glancy and T. L. Katzer was prepared cooperatively by the Nevada Department of Conservation and Natural Resources, Division of Water Resources and the U. S. Department of the Interior, Geological Survey. This report is available from the Office of the State Engineer.

FINDINGS OF FACT

I

Application 36403 was filed by Robert Leal, et al, on January 9, 1979, to appropriate 0.5 c.f.s. of underground water for quasi-municipal purposes. The point of diversion is within the SW 1/4 SW 1/4 Section 2, T.13N., R.20E., M.D.B. & M., and the place of use is to serve 120 lots within the SW 1/4 SW 1/4 Section 2, E 1/2 SE 1/4 Section 3, T.13N., R.20E., M.D.B. & M. 1/

II

By an Order dated June 14, 1977, the State Engineer designated and described the Carson Valley Ground Water Basin under the provision of NRS 534. 2/

III

It is estimated that the potential annual recharge to the ground water basin from precipitation is 25,000 acre-feet. The estimated annual sub-surface inflow to the ground water basin from California is approximately 7,000 acre-feet. The total annual recharge to the Carson Valley Ground Water Basin is, therefore, approximately 32,000 acre-feet per year. 3/ Any consumptive withdrawal in excess of the natural recharge will either deplete the ground water reservoir or cause additional surface water to percolate into the ground water reservoir.

IV

Existing certified and permitted ground water rights in the Carson Valley Ground Water Basin for irrigation and other purposes presently total over 40,000 acre-feet per year. 4/

V

The proposed point of diversion under Application 36403 is adjacent to a concentrated well area in the northeastern part of Carson Valley. This is a large residential area supplied by domestic wells in the immediate vicinity of the proposed appropriation. This residential area includes many unoccupied lots upon which a domestic well may be drilled without a permit.

VI

Applications to appropriate underground water to irrigate additional land and applications for quasi-municipal use in areas with concentrated wells have been denied in Carson Valley. 5/

CONCLUSIONS

I

The State Engineer has jurisdiction of the parties and the subject matter of this action. 6/

II

The State Engineer is prohibited by law from granting a permit where:

- A. There is no unappropriated water at the proposed source, or
- B. The proposed use conflicts with existing rights, or
- C. The proposed use threatens to prove detrimental to the public welfare. 7/

III

The granting of a permit under Applications 36403 near the concentrated domestic well area would tend to impair the value of those existing wells and threaten to prove detrimental to the public welfare. The potential exists for the additional development of unoccupied lots in this concentrated area. Rapid urbanization of Carson Valley indicates that domestic wells will eventually be drilled on most of the existing unoccupied lots.

RULING

Application 36403 is denied on the grounds that the appropriation of additional underground water for quasi-municipal use in the area of concentrated wells would tend to impair the value of existing rights and be detrimental to the public interest and welfare.

Respectfully submitted,

*William J. Newman*

William J. Newman  
State Engineer

WJN/JC/jm

Dated this 9th day  
of MAY, 1979.
