

IN THE MATTER OF APPLICATIONS 41034, )  
41035 AND 41036 TO APPROPRIATE WATER )  
FROM AN UNDERGROUND SOURCE IN )  
TRUCKEE MEADOWS, WASHOE COUNTY, )  
NEVADA )

R U L I N G

87

INTRODUCTION

In 1973, Water Resources - Reconnaissance Series Report 57, "A Brief Water - Resources Appraisal of the Truckee River Basin, Western Nevada" by A. S. Van Denburgh, R. D. Lamke, and J. L. Hughes was prepared cooperatively by the Nevada Department of Conservation and Natural Resources, Division of Water Resources and the U. S. Department of the Interior, Geological Survey. This report is available from the office of the State Engineer.

FINDINGS OF FACT

I

Applications 41034, 41035 and 41036 were filed by Gering Products, a Division of Dart Industries, Inc., on April 8, 1980, each to appropriate 0.06 c.f.s. of underground water for industrial (manufacturing) and domestic purposes. The points of diversion and place of use are within the NE $\frac{1}{4}$  SW $\frac{1}{4}$  Section 10, T.19N., R.20E., M.D.B.&M. The total appropriation under Applications 41034, 41035 and 41036 is estimated to be 96.7 acre-feet per year. 1/

II

Applications 41034, 41035 and 41036 were filed to appropriate water from an underground source from the Truckee Meadows Ground Water Basin, Washoe County, Nevada.

By an order dated March 1, 1978, the State Engineer designated and described the Truckee Meadows Ground Water Basin as a ground water basin coming under the provisions of NRS 534. 2/

III

It is estimated that the potential annual recharge to the ground water basin from precipitation is 27,000 acre-feet. The estimated annual sub-surface inflow of ground water is less than 1200 acre-feet. 3/

Any consumptive withdrawal in excess of the natural recharge will either deplete the ground water reservoir or cause additional surface water to percolate into the ground water reservoir.

IV

Existing certificated and permitted ground water rights in the Truckee Meadows Ground Water Basin for municipal, wildlife, commercial, irrigation and other purposes now exceed estimates of potential natural recharge. 4/

V

Hearings in the matter of pending applications to divert water from the Truckee Meadows Ground Water Basin were held by the State Engineer:

- A. On May 24, 1978
- B. On August 17, 1978

Applications for large additional underground appropriations have been denied. 5/

CONCLUSIONS

I

The State Engineer has jurisdiction of the parties and the subject matter of this action. 6/

II

The State Engineer is prohibited by law from granting a permit where:

- A. There is no unappropriated water at the proposed source, or
- B. The proposed use conflicts with existing rights, or
- C. The proposed use threatens to prove detrimental to the public interest. 7/

III

Existing water rights for ground water in the Truckee Meadows Ground Water Basin exceed the annual recharge from precipitation and underflow. To grant large additional rights would result in additional consumptive use in this designated basin. The large additional withdrawals and consumption would remove water from the ground water reservoir which:

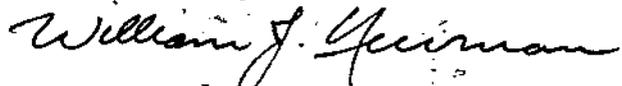

- A. Would not be replaced resulting in depletion of the ground water reservoir, or
- B. Would be replaced by infiltrating surface water that would otherwise remain in or return to the stream system.

The additional withdrawal and consumption of underground water as applied for would, therefore, conflict with and tend to impair the value of existing rights and threaten to prove detrimental to the public interest and welfare.

RULING

Applications 41034, 41035 and 41036 are denied on the grounds that the appropriation of additional ground water as applied for would conflict with and tend to impair the value of existing rights and threaten to prove detrimental to the public interest and welfare. .

Respectfully submitted,

William J. Newman  
State Engineer

WJN/JC/bc

Dated this 10th day of  
DECEMBER, 1980.
