

IN THE OFFICE OF THE STATE ENGINEER
OF THE STATE OF NEVADA

O R D E R

Van Sickle Enterprizes
4080 Voltaire Road
Carson City, Nevada 89701

This office has determined by field investigation that the Smith Creek Dam located in Section 31, T.18N., R.39E., M.D.B.&M., is an unsafe structure having recently sustained severe hydraulic fracturing, the dam, therefore, has become a hazard to both life and property.

You are hereby ordered, under the provisions of Nevada Revised Statute 535.030, to empty the reservoir by lowering the level of water at a rate not to exceed one (1) foot per day until the impoundment is drained.

The reservoir shall remain empty until plans and specifications for repair or reconstruction, as required under NRS 535.010, are submitted to the State Engineer and approved. Upon approval, all repairs or reconstruction of the dam and related structures must be accomplished and the dam determined to be repaired or reconstructed in compliance with the approved plans and specifications before any impoundment of water is allowed.

Peter G. Morros
State Engineer

Dated at Carson City, Nevada,
this 3rd day of JULY, 1984.
