

PLAN OF WORKS USED FOR STOCKWATERING AT McCULLOUGH SPRING.
Scale, 1 inch = 2 feet.

SECTION, A---A, OF TROUGH.
Scale, 1 inch = 1 foot.

NOTE:
No U. S. Land Survey Corner could be found near McCullough Spring. Therefore this spring was tied by course and distance to Tower 3, Mile 33, of the Southern California Edison Company's Boulder - Chino Transmission Line.
According to information received from this Company, Tower 3, Mile 33, lies S. 24° 09' 08" W., 62800 ft. from the Southeast corner of Section 36, Tp. 24 S., Rge. 62 E. This is the nearest point where this transmission line is tied to U. S. Land Corners.

STATE of UTAH
COUNTY of WASHINGTON ss.
I, LEO A. SNOW, being first duly sworn, depose and say that this map, consisting of one sheet, has been correctly drawn to the designated scale from field notes of a survey made by me on the 20th. day of October, 1946.
That it truly and correctly represents the location and extent of the works used to divert water from McCULLOUGH SPRING in CLARK COUNTY by A. C. MARSHALL for stockwatering purposes.
That all bearings shown thereon are compass bearings, using a magnetic declination of 16 degrees 30 minutes east.
That the point of diversion, the approximate location and size of the diverting channel, the place and manner of use, and the location and names of all other works or streams which are crossed by, or connect with the said works, are fully and correctly designated thereon.

STATE WATER RIGHT SURVEYOR.
Subscribed and sworn to before me this 29th day of February, 1948.

NOTARY PUBLIC in and for Washington County, Utah.
My Commission expires 2/28/1948
