

Approximate location of proposed new ditch. The exact point of diversion in the NW¼ of SE¼ of Sec. 18 will be determined when permission is received to enter upon the land to make a survey for the proposed new point of diversion and ditch. The preliminary location shown hereon beginning at the point "A" is partly in the County road right of way the point "A" being the upper end of the culvert which conveys Rice Creek, as shown hereon, under the County road. The proposed new ditch will empty into Spring Creek and then conveyed to land of the applicant in Section 20.

NOTE: The Claus Schoer Ranch comprises the NW¼ of Section 20 and other land north and west. The Vern Hansen Ranch comprises the S½ and NE¼ of Section 20 and other land south and east. This map is submitted to show the irrigation system now employed on the Claus Schoer and Vern Hansen (formerly J. H. Bradish) Ranches as shown by portions of the Cultural Maps now on file in the Office of the State Engineer, of which this map is a copy, except for the location of the proposed new ditch. This application to change the point of diversion is being made to enable the applicant herein to secure what he claims is his just share of the waters direct from Rice Creek by constructing a new ditch from a new point of diversion from Rice Creek instead of by way of overflow or waste water from lands of Claus Schoer as applicant claims is the present method of his securing irrigation water.
