
PLACES OF USE AND CULTURE

PLACES OF USE AND CULTURE ARE BASED ON
1881 GENERAL LAND OFFICE SURVEY PLATS OF THE HISTORIC MEADOW
CULTURAL MAPS FILED WITH APPLICATIONS 2210 AND 18310
SHEETS 1 AND 2 DEPICT THE HISTORIC MEADWS DEVELOPED IN THE 1870s
SHEETS 3 AND 4 SHOW HOW THIS CULTURE WAS MODIFIED IN THE EARLY TO MID 1900s
SHEET 5 IS A TABULATION SHOWING THE TWO CULTURES COMBINED

POINTS OF DIVERSION:

P.O.D.s ARE SHOWN ON MAPS
FOR APPLICATIONS
2210, 1830, 52302, V03305,V06492, V05813, & V010692

STATE OF Nevada
COUNTY OF Carson City SS.

I, WILLIAM FRANCIS PRICE, BEING FIRST DULY SWORN, DEPOSE AND SAY THAT THIS MAP, CONSISTING OF 4 SHEETS, NUMBERED FROM 1 TO 4, INCLUSIVE, HAS BEEN CORRECTLY DRAWN BY ME TO THE DESIGNATED SCALE BASED ON USGS TOPOGRAPHIC MAPS,US DEPARTMENT OF INTERIOR GENERAL LAND OFFICE PLATS, CULTURAL MAPS FILED WITH APPLICATIONS 2210 AND 13810, AND GEOGRAPHIC COORDINATE DATA BASE (GCDB) DATA, ALL OF WHICH HAVE BEEN REVIEWED BY ME BETWEEN JULY, 2014, AND FEBRUARY 5, 2016. THAT IT TRULY AND CORRECTLY REPRESENTS THE LOCATION AND EXTENT OF THE WORKS USED TO DIVERT WATER FROM BIG SPRINGS, ALSO KNOWN AS JOHNSON SPRINGS, HARDY CREEK, LONG CANYON SPRING AND AN UNNAMED SPRING , IN ELKO COUNTY, NEVADA, BY ELKO LAND AND LIVESTOCK COMPANY AND ITS PREDECESSORS, FOR STOCK WATERING AND IRRIGATION PURPOSES. THAT THE POINTS OF DIVERSION,THE APPROXIMATE LOCATIONS OF THE DIVERTING CHANNELS, THE PLACE AND MANNER OF USE, AND THE LOCATION AND NAMES OF ALL OTHER WORKS OR STREAMS WHICH ARE CROSSED BY, OR CONNECTED WITH THE SAID WORKS, ARE FULLY AND CORRECTLY DESIGNATED HEREON.

STATE WATER RIGHT SURVEYOR: _____
WILLIAM FRANCIS PRICE, NEVADA WATER RIGHT SURVEYOR NO. 685

SUBSCRIBED ANS SWORN TO BEFORE ME
THIS 5 DAY OF February 2016.

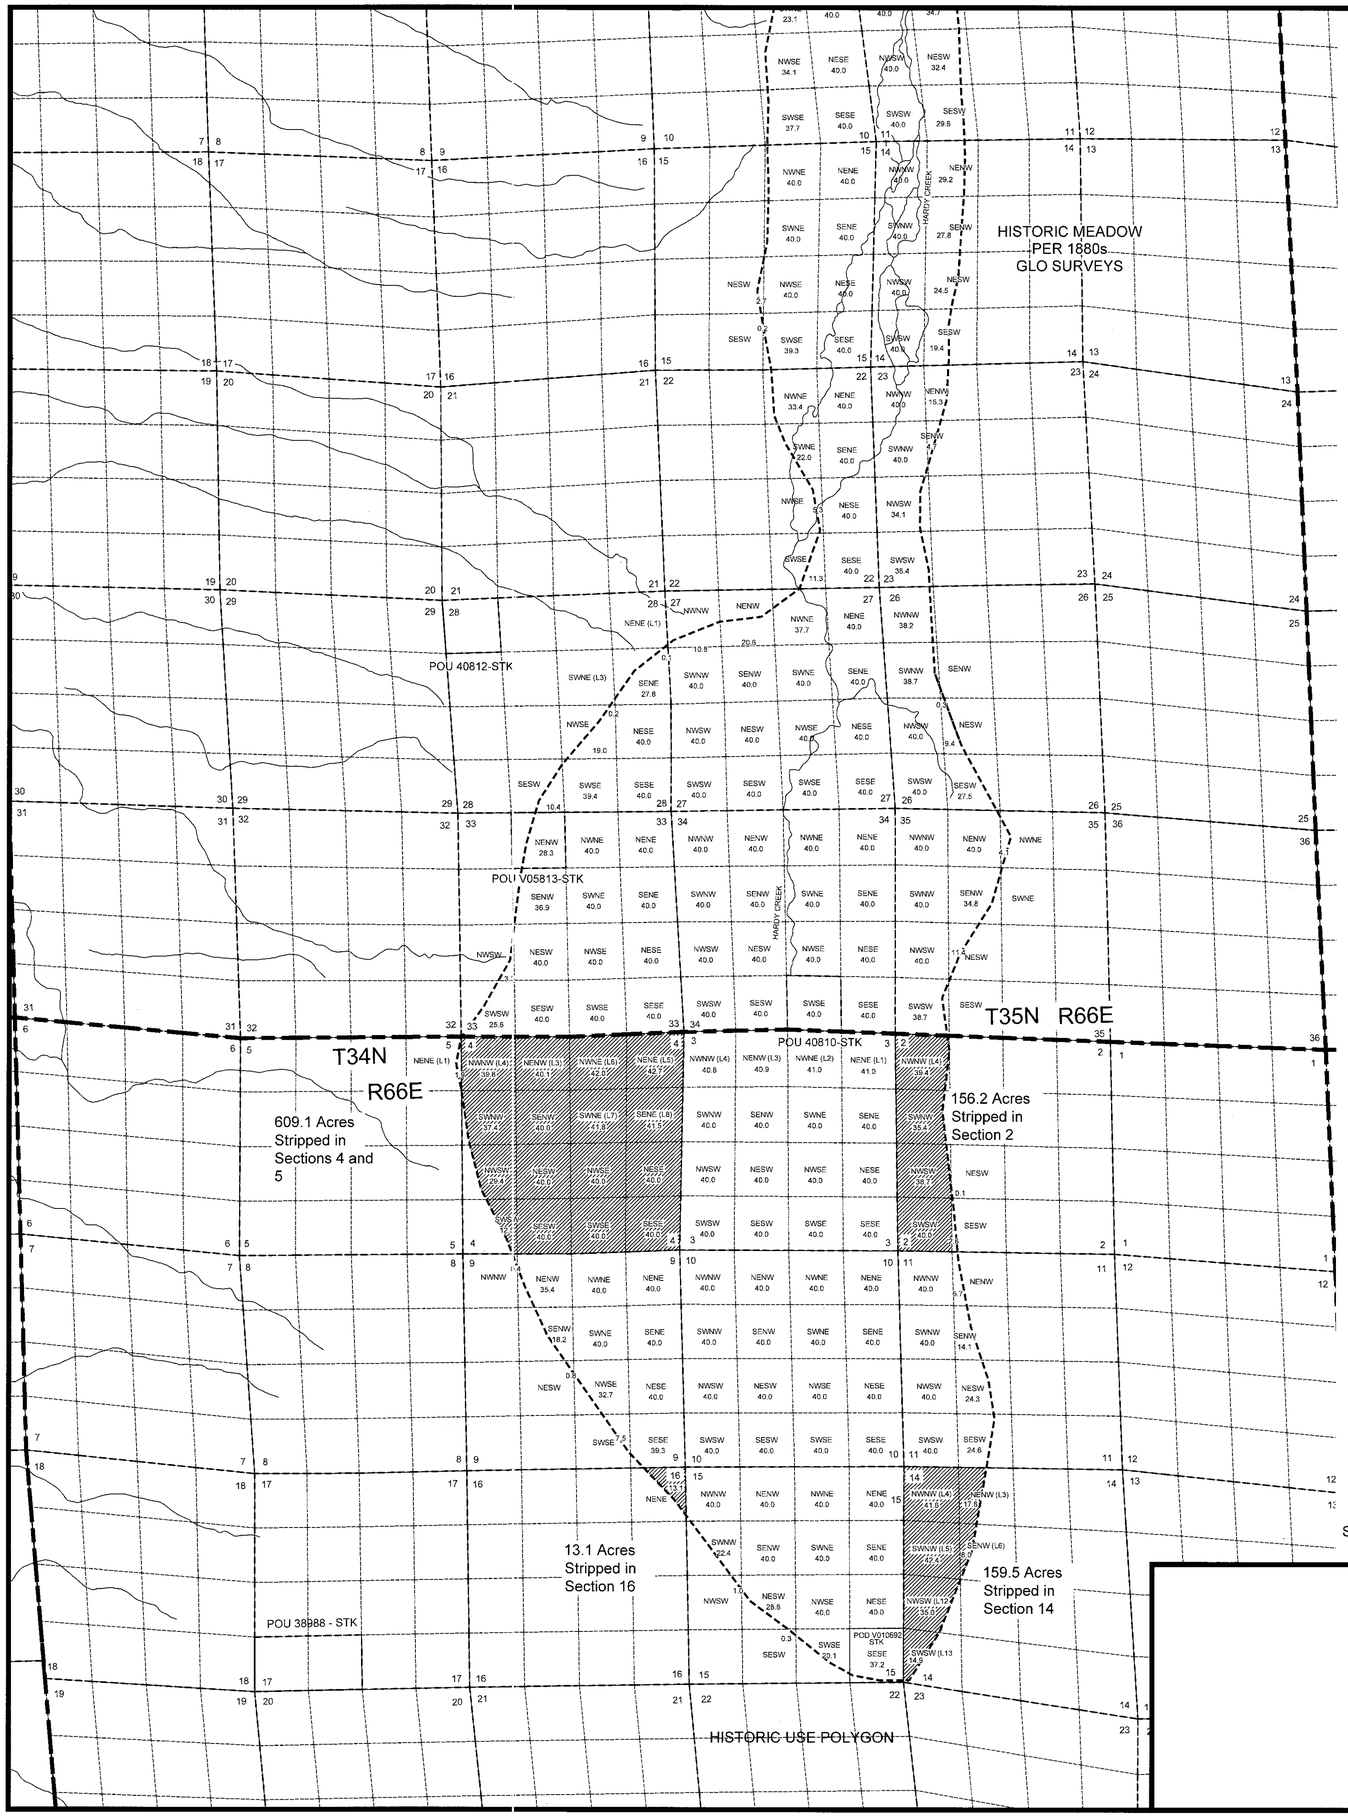
V10692 V04692



NOTES REGARDING THE DEVELOPMENT OF THIS MAP:

1) Historic uses were identified by the U.S. Department of Interior, General Land Office (GLO) during surveys conducted between 1880 and 1882.

2) The GLO maps were geo-referenced and the limits of the culture were identified. Topographic features reported by the GLO surveyors were used to adjust the cultural polygon where necessary.

3) The best available estimate of the Public Land Survey System (PLSS) lines was obtained from the U.S. Department of Interior, Bureau of Land Management (BLM), successor to the GLO. These data are known as the Geographic Coordinate Data Base (GCDB).

4) The historic polygon was divided into forty acre aliquot parts using GCDB as a key. This polygon was found to extend outside the Study Area originally identified for the Big Springs Adjudication. The mapping area was expanded accordingly.

5) Applications 2210 and 18310 were changes of the historic culture. In sum, these changes involved establishing a reservoir east of the Big Springs complex, stripping some of the downstream uses, then moving some of these uses east of the historic use polygon. These changes were made in the northern portion of the Study Area only. These cultural maps, as geo-referenced, are used as a backdrop for the close up maps of the northern portion of the Study Area (Sheets 3 and 4).

6) In the northern portion of the Study Area, the historic culture for each forty acre aliquot part is reported by the larger numbers. The smaller numbers represent the culture calculated from the cultural maps (Sheets 3 and 4 only).

7) GCDB data were used to geo-reference the cultural maps for Application 2210 and Application 18310. The culture identified on these maps was broken into forty acre aliquot parts and tabulated..

8) This map does not represent a field survey. The surveys were conducted previously beginning with Application 2210 and all are incorporated herein by reference.

9) A field survey of the historic uses possible at the present time due to a persistent drought. There is no doubt, however, that water would return to some or all of the historic polygon once the precipitation cycle resumes.

10) There is a discrepancy with respect to the cultural map that was provided with Application 2210. This cultural table cites 201 acres in the NE¼ of Section 3, T35N, R66E, which is not possible. Upon review of the map, it appears the table should cite the SE¼ of said Section 3 as well. There also appears to be 1 extra acre cited, which was ignored during this compilation.
